

Add formal policy checking as a first-class evaluation type — results that name the clause that failed and the case that breaks it.

Builder Studio drives it · Japes SDK supplies the shared domain objects and policy packs

V1 proof cases

- **Financial spreading documents (VP2)** — live Japes work
- MACER fresh-run isolation
- Document admission and safe materialization
- Approved policy to executable rule

NON-COMPLIANT · `spread.promotion_gate`

Spread S-77 was promoted carrying an unapproved EBITDA adjustment.
