

JPMorgan Insurance Compliance Demo — Build Script

ACT 0 — PREAMBLE & DASHBOARD

SCREEN 1 — DEMO HUB

No script needed. User navigates to the JazzX AI Future of Work Demos hub and clicks "Commercial Insurance Diligence."

SCREEN 2 — LAUNCH SCREEN

Body copy:

Learn how JazzX AI transforms commercial insurance compliance review for lending — turning scattered policies, certificates, and flood determinations into a clear, audit-ready diligence file.

Button: Launch the Insurance Compliance Demo

SCREEN 3 — PERSONA CARD

Visual: Nathan's headshot left. Content right. Dark gradient background. "Next" button bottom left.

Name / Title:

Nathan Brooks **Senior Insurance Specialist — Commercial Insurance Due Diligence**

Nathan's Pain Points

- **Reviewing insurance across a high volume of loans**, making sure every property is properly covered before the bank funds — and that nothing slips through at the eleventh hour before closing.
- **Reconciling scattered evidence** — certificates, full policies, endorsements, flood determinations, statements of value — submitted by brokers in inconsistent formats, where the certificate often doesn't match the bound policy.
- **Catching coverage gaps that aren't obvious on the surface**, such as a stale limit that no longer covers a newly built structure, a mortgagee clause naming the prior lender, or a flood requirement created by a recent map change.
- **Producing a defensible, audit-ready insurance review under tight closing timelines**, where every condition has to trace back to a source document.

Button: Next

SCREEN 4 — JAZZ GREETING

Visual: Nathan's photo dimmed on left. Jazz avatar (bottom right). Speech bubble center-right.

Jazz says:

Good morning, Nathan!

You have 2 files in your Attention Zone today. Solmara Bay Apartments — a \$32M multifamily refinance closing soon — is the highest priority.

I've already assembled the loan and collateral context, organized the broker's insurance package, consumed the flood determination result, and run the first-pass insurance review. Let's look at what needs your judgment.

Button: Let's Go → *lands on Screen 5: Dashboard*

SCREEN 5 — DASHBOARD

Header:

Hi Nathan, here's your insurance review pipeline for this week.

Key Metrics Bar:

Metric	Value
 Jazz Amplification	9.6x
 Median Days to Insurance Decision	3.8 business days
 Returned After Clearance	0

*On-screen caveat line beneath the metrics bar: **Illustrative demo metrics · not production data.***

Presenter note: Point to Returned After Clearance = 0. "Zero files came back after Jazz cleared them for closing. For an insurance team, that's a process-quality number — it means nothing slipped to the eleventh hour and nothing bounced back from the closing table."

Metrics rationale (INTERNAL build/presenter note — NOT on screen; on-screen these stay simple and are flagged illustrative):

- **Jazz Amplification 9.6x** = baseline manual specialist touch **88.3 min/file** ÷ Jazz-assisted specialist touch **9.2 min/file** = 9.6x. (The 9.2 min ties to the "Insurance Cleared for Closing" hover figure, so the metric is anchored to a number elsewhere on the dashboard.) On screen, optional one-liner: "*Based on reduction in specialist touch time after Jazz prepares the review.*"

- **Median Days to Insurance Decision 3.8 business days** = median elapsed business days from broker-package receipt to either Insurance Cleared for Closing or broker-cure package prepared. This is a *cycle-time* metric (includes broker/document wait + routing), deliberately distinct from the 9.2-min specialist-touch metric — so "3.8 days" and "9.2 minutes" don't appear to contradict. Rename the on-screen label from "Median Review Days" to "**Median Days to Insurance Decision.**"
- **Returned After Clearance 0 = 0 of 9** insurance-cleared files reopened after closing-team review this week.
- All three are **illustrative demo metrics, not production data.** Keep the on-screen flag visible.

JazzTrack Flow Diagram — five nodes:

Node Label		Count Bucket logic (not on screen)	
1	New Packages	4	Insurance packages newly arrived this week
2	Broker Follow-Ups	2	Returned broker-cure / follow-up work this week
3	Assigned to Me	6	This week's intake (4 + 2) — subset of JazzTrack
4	JazzTrack / In Review	22	Active insurance-review queue (this week's 6 + 16 backlog)
5	Insurance Cleared for Closing	9	Separate exited pool — insurance review complete

Attention Zone — 2 files (breaking downward from the JazzTrack node · subset of the 22 in JazzTrack)

UI cue: visually emphasize that of 22 files on JazzTrack, only 2 require Nathan's judgment today — Nathan is a senior specialist handling judgment cases, not every intake item. The Attention Zone is the focal point of the screen; the 22 are progressing without him.

Build note: the "Bucket logic" column is documentation for the team — it does not appear on screen. The flow diagram on screen shows only Label and Count.

Flow reconciliation (presenter note — so the audience doesn't do mental math):

Weekly intake = 4 new packages + 2 broker follow-ups = 6 assigned to Nathan this week. Active JazzTrack queue = 22 files now = those 6 current-week items + 16 carried backlog. Attention Zone = 2 files inside the 22 where Nathan's judgment is required

today. Insurance Cleared for Closing = 9 files that exited this week — a separate pool, not a subset of the 22 active files.

Presenter note: *"Nathan has 22 insurance files in review right now. Jazz is advancing all of them in parallel — classifying documents, extracting coverage terms, checking them against requirements. His judgment is needed on exactly 2 today. Solmara Bay is in the Attention Zone because Jazz took the file as far as it can and found four open conditions. Everything else is progressing without manual intervention. That's the 9.6x."*

HOVER STATES — JAZZTRACK DIAGRAM NODES

Hover State 1 — Assigned to Me

Panel label: *"Assigned to Me"*

Donut chart breakdown:

Loan Type	Count
Multifamily Conventional	4
Mixed-Use	1
Multifamily Affordable	1
Total	6

"Here's What I'm Doing..."

- Setting up insurance-review workspaces for newly assigned files
- Classifying broker insurance packages — certificates, policies, endorsements, flood evidence
- Consuming flood determinations and mapping each structure to its flood-zone status

Hover State 2 — JazzTrack

Panel label: *"On The JazzTrack →"*

- 22 insurance files in review
- 6 assigned items this week — 4 new packages + 2 broker follow-ups
- 16 files in the active backlog

"Here's What I'm Doing..."

- Extracting named insured, mortgagee, limits, deductibles, and endorsement terms from each policy

- Checking coverage against the federal flood floor, the lender overlay, and the insurance requirement set
- Preparing condition summaries and broker requests pending specialist confirmation

Hover State 3 — Insurance Cleared for Closing

Panel label: *"Insurance Cleared for Closing →"*

- 9 files insurance-cleared this week
- \$214M total loan volume cleared
- Average specialist time per file: **9.2 minutes**

"Here's What I'm Doing..."

- Monitoring closing queues for any late insurance changes
- Tracking that cleared conditions stay cleared through to funding
- Flagging any closing-team questions back to the specialist

Hover State 4 — Attention Zone (Solmara Bay)

Panel label: *"Attention Zone →"*

Most Urgent: **LN-CRE-2026-0418**

Solmara Bay is a strong refinance awaiting final insurance review before closing.

4 conditions open on this file:

- Mortgagee / lender's loss payable names the prior lender
- Named insured is the sponsor, not the borrowing entity
- Replacement-cost coverage gap (newly built clubhouse)
- Flood coverage missing on two buildings (recent flood-zone recertification)

Button: Start Reviewing

Presenter note: *"Nathan has 22 insurance files on JazzTrack. Jazz is advancing all of them. His judgment is needed on exactly 2 today. Solmara Bay is in the Attention Zone because Jazz took the file as far as it can and found four open conditions — and, importantly, each one traces to something recent or specific Jazz can show him. Everything else is progressing without him. That's the amplification."*

SCREEN 6 — INSURANCE REVIEWS IN PROGRESS (Attention Zone → View All)

Triggered by clicking the arrow icon on the Attention Zone hover panel.

Breadcrumb: Reviews > Insurance Reviews in Progress

Page Title: Insurance Reviews in Progress

Search bar placeholder: Search files, borrowers, entities...

Right side: Filter · Export · Columns (icon buttons)

Summary Strip:

Stat	Value
Needs Attention	2
On JazzTrack	22
Insurance Cleared for Closing (This Week)	9

Filter Chips Row:

Attention Zone (2) ← *selected on arrival* · JazzTrack / In Review (22) · Insurance Cleared This Week (9)

Build note: Attention Zone (2) is a subset of JazzTrack (22) — clicking JazzTrack shows all 22 including the 2 in Attention Zone; clicking Attention Zone narrows to those 2.

Section 1 — Needs Attention (2)

File Name	Borrower / Entity	Loan Amount	Blocker	Next Action	Last Update
Solmara Bay Apartments — Refinance	Lindover Residential Group / Solmara Bay Owner LLC	\$32.0M	4 insurance conditions open (<i>mortgagee name</i> · <i>named insured</i> · <i>replacement-cost gap</i> · <i>flood coverage</i>)	Start Reviewing (primary)	Just now
Harborview Flats — Refinance	Harborview Sponsor Group / Harborview Borrower LLC	\$29.5M	1 documentation condition (<i>replacement certificate required</i>)	Review (secondary)	2 hours ago

Row click behavior:

- Solmara Bay row → opens Solmara Bay file (same as Start Reviewing)
- Harborview row → toast: "  Queued — will review after Solmara Bay." No navigation.

Section 2 — On JazzTrack (22)

Build note: reuse the CA demo's filler-row pattern — 22 representative rows with Loan ID, deal name, borrower/entity, loan amount, application date, loan type. Clicking any row → toast: "Viewing the full file list is out of scope for today's demo." No navigation. (Row content is illustrative; keep names composite.)

Numbers that close the loop at end of demo:

- JazzTrack / In Review 22 → Nathan touches 2 today
- *Scope note (small on-screen copy where the term appears): "Insurance Cleared for Closing" = insurance review only; credit, legal, and closing approvals remain separate.*
- Insurance Cleared for Closing stays **9** — Solmara Bay does NOT clear in this demo; after Nathan works the conditions and one returns and clears live, the file sits at **Broker Cure Pending** (3 of 4 conditions still out for cure). It only moves to Insurance Cleared once all four resolve.
- Returned After Clearance 0 → stays 0, reinforcing quality at close

ACT 1 — THE SOLMARA BAY FILE

File review opens on the Highlights tab. Tabs across the file: Loan & Collateral · Documents · Highlights · JazzAssessment. (*Loan & Collateral, Documents, and JazzAssessment are built in Stage 2. Stage 1 covers Highlights — the 5-second state-of-the-file screen.*)

[[TAB]]: HIGHLIGHTS

Goal

Make the state of the insurance file legible in 5 seconds. Show Nathan the four conditions that need his judgment, what each one impacts, what Jazz already concluded, and what unlocks when he resolves them. Everything else belongs in Loan & Collateral, Documents, or JazzAssessment.

A) Deal Banner (top of screen, persistent across all tabs)

Field	Value
Borrower	Solmara Bay Owner LLC
Sponsor	Lindover Residential Group LLC
Loan ID	LN-CRE-2026-0418
Loan Amount	\$32,000,000 (refinance)

Field	Value
Property	Solmara Bay Apartments — 244 units · 13 structures
Location	Tampa, FL
Prior Lender	Gulfstream Community Bank (being paid off)
Closing	18 days

Property Image: Top right of the deal banner — aerial view of Solmara Bay Apartments. Breaks text monotony and connects to the asset.

Presenter note: *"Everything you see here is already assembled by Jazz — the loan, the borrower, the sponsor, the 13 structures, the flood determination. Nathan is not hunting for documents. He's stepping into an insurance file that's already organized and ready for judgment."*

B) Headline Strip (the 5-second read)

Primary headline (large, top of page):

4 Conditions to Review

Presenter note: *"Nathan lands on Highlights and sees the state of the file in one line. Jazz reviewed the whole insurance package before he arrived, cleared most of it, and four conditions remain — across four categories. Insurance clearance is locked until he resolves them. That's the demo in a sentence."*

C) Four Condition Cards (the core of the screen)

Build pattern — all four cards share the same structure (mirrors the CA demo):

- Condition tag (QUALIFYING ISSUE · SUPPORT REQUIRED · OPEN QUESTION)
- Title
- Business impact (large, bold — the headline consequence)
- Source comparison (one line — where the finding comes from)
- Short explanation (1–2 sentences, including the *recent-development* storyline where relevant)
- Policy basis row + Benchmark row (two compact, clickable lines — open a guideline drawer)
- Suggested Action panel (distinct callout, lightbulb icon)
- CTA (state-aware verb)

Interaction note: Policy and Benchmark rows are clickable. Clicking opens a lightweight guideline drawer showing the relevant excerpt, the source name, and a short explanation of why Jazz mapped this condition to that rule. The citation is an entry point, not decoration.

Condition Card 1 — Mortgagee / Lender's Loss Payable Names the Prior Lender

Tag: QUALIFYING ISSUE

Title: Mortgagee Clause Names the Prior Lender

Business Impact:

The bank's lien interest is not protected on the policy

Source Comparison:

Policy mortgagee clause reads *Gulfstream Community Bank* vs. required *JPMorgan Chase Bank, N.A.*

Explanation:

This is a refinance, but the policy still names the prior lender as mortgagee and loss payee. Until it's corrected, a loss could pay the wrong lender. The named insured is the sponsor, not the borrowing entity — common when a sponsor carries a master / blanket program. That structure is acceptable, but the borrower's coverage must be documented. Jazz requests a Letter of Explanation plus schedule support. (*Detail in drill-in.*)

Policy basis: Mortgagee clause / lender's loss-payable requirement (*maps to the client's insurance underwriting guidelines in production*)

Benchmark: Freddie Mac Multifamily Guide Chapter 31 — property policy must carry a standard mortgagee / lender's loss-payable clause; lender-required successors-and-assigns wording (*drawer cites §31.2(e) Mortgagee clause and additional insured; representative public benchmark*)

Suggested Action: Request a revised mortgagee / lender's loss-payable endorsement naming JPMorgan Chase Bank, N.A., ISAOA/ATIMA.

CTA: [**Request Corrected Endorsement**] → goes to JazzAssessment > Lender Interest & Mortgagee

Condition Card 2 — Named Insured Is the Sponsor, Not the Borrowing Entity

Tag: SUPPORT REQUIRED

Title: Named Insured Is the Sponsor

Business Impact:

Coverage may sit under the sponsor's program, not the borrower

Source Comparison:

Policy named insured reads *Lindover Residential Group LLC* (sponsor) vs. borrowing entity *Solmara Bay Owner LLC*

Explanation:

The named insured is the sponsor, not the borrowing entity — common when a sponsor carries a master / blanket program. That structure is acceptable, but the borrower's coverage must be documented. Jazz requests a Letter of Explanation plus schedule support. (*Detail in drill-in.*).

Policy basis: Named insured / borrower coverage requirement (*maps to the client's insurance underwriting guidelines in production*)

Benchmark: Freddie Mac Multifamily Guide Chapter 31 — borrower must be the named insured; master / blanket property programs are acceptable structures but the borrower's coverage must be documented (*drawer cites §31.2(d) Named insured and §31.3 Blanket or Master Insurance Policies; representative public benchmark*)

Suggested Action: Request a Letter of Explanation confirming Solmara Bay Owner LLC and Solmara Bay Apartments are scheduled and covered under Lindover's master property insurance program.

CTA (initial state): [Request Letter of Explanation] → goes to JazzAssessment > Named Insured & Insured Entity

Named-insured state lifecycle (this is the document-chase proof point — mirrors the CA demo's LOE flow):

State	Tag	CTA
Initial	SUPPORT REQUIRED	Request Letter of Explanation
LOE received and read by Jazz	READY FOR CONFIRMATION	Confirm Named Insured
Nathan confirms	COMPLETE	Completed

Build note: This card is the document-chase proof point for the demo. The tag flows SUPPORT REQUIRED → READY FOR CONFIRMATION → COMPLETE as the LOE moves

through request, Jazz review, and Nathan's confirmation. Jazz drafts the request; Nathan sends and confirms. Do not flip the tag to QUALIFYING ISSUE — the semantics would be wrong (this is a support-gathering item, not a hard defect). Use "master / blanket property program," never "umbrella" — umbrella means excess *liability* and would be wrong here.

Condition Card 3 — Insurance Schedule Stale vs. Collateral (Newly Built Clubhouse)

Tag: QUALIFYING ISSUE

Title: Insurance Schedule Missing the New Structure

Business Impact:

Newly completed clubhouse not evidenced in the insurance schedule

Source Comparison (the evidence — show all four lines):

Collateral schedule: **13 structures** · Policy Statement of Values (SOV): **12 structures** · Updated rebuild-cost support: **\$38.0M** · In-force limit / agreed amount: **\$34.2M**

Explanation (keep card copy short — full detail in the drill-in):

The clubhouse (13th structure) finished ~6 months ago; the insurance schedule still appears tied to the original 12. The **schedule looks stale vs. the collateral** — Nathan confirms whether the clubhouse is covered and what basis applies.

Policy basis: Property damage coverage / insurable value / SOV completeness (*maps to the client's insurance underwriting guidelines in production*)

Benchmark: Freddie Mac Multifamily Guide Chapter 31 — property damage coverage on a replacement-cost basis; statement of values should reflect the covered/scheduled structures (*drawer cites §31.5 Property damage insurance; representative public benchmark*)

Suggested Action: Review the coverage basis, then request an updated Statement of Values (SOV) and coverage evidence reflecting the full 13-structure schedule once Nathan confirms the \$38.0M replacement-cost basis applies.

CTA: [**Review Coverage Basis**] → goes to JazzAssessment > Property Coverage Adequacy

Jazz Lens on this card (the human-judgment beat — not a separate condition):

"Coverage basis requires Nathan's confirmation: confirm the clubhouse is covered, then apply full replacement cost, an accepted lender threshold, or route a lender exception. Jazz prepared the updated rebuild-cost support but routes the basis decision to the specialist."

Build note on framing (important — per Eshwar):

- The basis is **cost to rebuild / replacement cost**, NOT appraised value. "Appraised value" / "market value" must not appear anywhere on this card.
 - The *condition* is firm and not in question: the schedule shows 12 structures, the collateral has 13 — that **schedule mismatch** is the demonstrable defect, harder to challenge than any value-based framing. The \$34.2M-vs-\$38.0M figures are drill-in context (new rebuild exposure requiring review), NOT the headline. Note: \$34.2M is exactly 90% of \$38.0M and Freddie's multi-building standard can be 90% of insurable value — so a numeric-shortfall headline would let a reviewer call the policy compliant. Lead with the schedule mismatch, not the dollar gap.
 - The *open question* is narrower — what basis sets the required limit. That judgment lives in the **Jazz Lens / JazzAssessment Property Coverage Adequacy panel**, NOT as a second card on Highlights. There is no "Card 3b" on Highlights — the headline counter stays at **4 conditions**.
-

Condition Card 4 — Flood Coverage Missing on Two Buildings (Updated Determination)

Tag: QUALIFYING ISSUE

Title: Flood Coverage Missing — Buildings B4 & B9

Business Impact:

Federal flood evidence missing on two newly identified SFHA buildings

Source Comparison:

Updated Flood Zone Determination / SFHDF now identifies B4 & B9 as Special Flood Hazard Area buildings · no flood evidence on file for them

Explanation:

An updated flood determination (FZD / SFHDF) now identifies B4 and B9 as SFHA buildings — they were not previously identified as such on file, so the requirement is new. No flood evidence is on file for these two. (*Review context: elevated storm-season risk — see drill-in.*)

Policy basis: Federal flood insurance requirement (federal floor; lender overlay above it)

Benchmark: 12 CFR Part 22 — buildings in a Special Flood Hazard Area require flood evidence; the FZD / SFHDF is the determination artifact (§22.3 requirement; §22.6 determination form)

Suggested Action: Request federal-minimum flood coverage for B4 & B9; the lender's excess-flood overlay is prepared by Jazz and follows once base federal evidence is in place.

CTA: [Request Flood Coverage] → goes to JazzAssessment > Flood Compliance

Build note:

- The **primary** headline issue is that the **federal flood minimum is missing** for B4 & B9 — lead with that. The lender overlay is secondary and pending behind the base federal evidence; do not make the overlay the headline when the floor itself is missing.
- In Stage 2, the Flood Compliance category shows two rows: **Federal flood floor — Condition** and **Lender overlay / excess flood — Prepared by Jazz, pending base evidence**.
- El Niño is **context only** (it's why the review happened). The legal trigger is the **updated FEMA determination (FZD / SFHDF)**, never El Niño itself. Show flood amounts as a per-building requirement, not a "\$500K × N" formula.

D) Insurance Clearance Status (blocked until all 4 conditions resolve)

Section header: Insurance Clearance Status

State	Status	Basis
Broker package as submitted	Not clearable	Mortgagee names prior lender · named insured is sponsor · schedule stale vs. collateral · flood missing on B4/B9
Jazz working state	⚠ Pending resolution	4 conditions open across 4 categories
Insurance Clearance	🔒 Blocked	Issued only after all four conditions resolve

Critical rules:

- Do NOT show the file as "Insurance Cleared for Closing" while any condition is open.
- "Insurance Clearance" flips from **Blocked** to **Issued** only after all four conditions are confirmed in JazzAssessment.

- In this demo the file does NOT reach Issued — it ends at **Broker Cure Pending** (see end-state note). The working-state row says **Jazz working state**, not "Jazz conservative state."

Presenter note: *"The broker's package looks complete at a glance, but Jazz is telling Nathan four things aren't right — and three of them exist because something changed recently: a new clubhouse, updated flood determination. The file can't clear until Nathan works through each one. Once he does, the clearance locks automatically — no spreadsheet, no manual checklist."*

E) Workflow Payoff Strip

Full clearance path (future-state — what unlocks when all four conditions resolve):

Insurance review finalizes · Clearance moves from Blocked to Issued · Audit-ready package assembles · Insurance Cleared for Closing activates

Today's demo payoff (what the room actually sees):

Nathan works all four conditions; the Letter-of-Explanation round-trip returns and **one condition clears live**. The file ends at **Broker Cure Pending** — three conditions still out for cure — with the audit trail and broker-cure package assembled. The payoff is the live clear plus the prepared package, not a full clearance.

Build note: This is a strip, not a CTA panel. It tells the booth viewer what Nathan's judgment unlocks, so the four condition cards aren't just "problems" — they're the gating items between the current state and a closing-ready insurance file. No button, no action — pure foreshadowing.

F) Compact Context Strip (property snapshot)

Property Snapshot

Solmara Bay Apartments · Tampa, FL · 244 units

13 structures (12 residential + 1 clubhouse, completed ~6 months ago) · 5 buildings in a Special Flood Hazard Area · \$32M refinance into JPM

-  **Strength:** Loan, collateral, entity, and flood determination already assembled and verified by Jazz
-  **Watch:** Insurance out of sync with two recent changes (new clubhouse, flood recertification); clearance blocked until the 4 conditions resolve

G) Lower Actions

- **Secondary:** [[Go to JazzAssessment](#)] · [[View Documents](#)] · [[View Loan & Collateral](#)]

No primary CTA here — the four condition cards carry the primary actions.

[[TAB]]: LOAN & COLLATERAL

(A supporting drilldown inside the Solmara Bay file. The demo lands on Highlights first; Nathan opens this tab to see the insurance-relevant deal context behind the conditions — not a full credit underwriting view. It exists so every condition has its loan/collateral evidence one tab away.)

TAB HEADER

LOAN & COLLATERAL Solmara Bay Apartments · LN-CRE-2026-0418 · \$32,000,000
refinance

Status badge: File organized by Jazz

Subtitle: The loan, borrower, sponsor, and collateral context have been assembled and the flood determination consumed — organized for insurance review.

Presenter note: *"Before any conditions, Nathan sees the file is already organized. Jazz assembled the loan and collateral context and consumed the flood determination. He's not hunting — he's stepping into a prepared file. Note this is the insurance-relevant context; credit and legal review sit with other teams."*

SECTION 1 — LOAN OVERVIEW

Field	Value
Loan ID	LN-CRE-2026-0418
Transaction	Refinance (paying off prior lender)
Borrower	Solmara Bay Owner LLC
Sponsor	Lindover Residential Group LLC
Loan Amount	\$32,000,000
Prior Lender	Gulfstream Community Bank
New Lender / Mortgagee (required)	JPMorgan Chase Bank, N.A.
Closing Milestone	18 days

Presenter note: *"The core of the deal: a \$32 million refinance into JPM, paying off Gulfstream. That refinance is why the mortgagee on the policy has to change — hold that, it's the first condition."*

SECTION 2 — COLLATERAL & BUILDING SCHEDULE

Field	Value
Property Name	Solmara Bay Apartments
Address	4400 Bayshore Vista Dr, Tampa, FL 33611
Asset Type	Garden-style multifamily
Total Units	244
Structures	13 total — 12 residential buildings (B1–B12) + 1 clubhouse
Newest Structure	Clubhouse — completed ~6 months ago
Buildings in a Special Flood Hazard Area (SFHA)	5 — B3, B4, B7, B9, B11

Building schedule (the load-bearing collateral view — every building, flood-zone chip per building):

Building	Type	Flood Zone
B1	Residential	Zone X
B2	Residential	Zone X
B3	Residential	Zone AE (SFHA)
B4	Residential	Zone AE (SFHA)
B5	Residential	Zone X
B6	Residential	Zone X
B7	Residential	Zone AE (SFHA)
B8	Residential	Zone X
B9	Residential	Zone AE (SFHA)
B10	Residential	Zone X
B11	Residential	Zone AE (SFHA)
B12	Residential	Zone X

Building	Type	Flood Zone
----------	------	------------

Clubhouse Amenity (new, ~6 months) Zone X

Presenter note: *"This is the foundation of an insurance review — Jazz doesn't treat the property as one block. It's 13 structures, each with its own flood-zone status from the determination. Two things to notice: the clubhouse is new, finished about six months ago — and B4 and B9, both in the flood zone, are where the flood condition lands. The per-building view is what makes the insurance conditions precise."*

Build note: the building schedule is the collateral spine that Conditions 3 (clubhouse / 13th structure) and 4 (flood on B4 & B9) both hang on. Flood-zone chips per building come from the consumed FZD / SFHDF — shown as *result on file*, never "Jazz triggered the vendor determination." Show the 5 SFHA buildings highlighted.

SECTION 3 — BORROWER & SPONSOR (insurance-relevant)

Field	Value
Borrowing Entity	Solmara Bay Owner LLC
Entity Type	Single-purpose entity (SPE)
Sponsor / Parent	Lindover Residential Group LLC
Insurance Program Context	Sponsor carries a master / blanket property program across multiple assets
Named Insured on Policy (as submitted)	Lindover Residential Group LLC (sponsor)

Presenter note: *"Here's the insurance-relevant entity picture. The borrower is a single-purpose entity, Solmara Bay Owner LLC. The sponsor, Lindover, runs a master property program across its portfolio — and the policy names the sponsor, not the borrower. That mismatch is the second condition, and it's a documentation question, not a defect — we'll resolve it with a letter of explanation."*

Build note: "master / blanket property program," never "umbrella" (umbrella = excess liability). This section seeds Condition 2; the named-insured-is-sponsor fact is shown here as context, surfaced as a condition in Highlights, and resolved via the LOE flow in this Documents tab + JazzAssessment.

SECTION 4 — INSURANCE-IN-PLACE SUMMARY

Field	Value
Property Carrier	Meridian Specialty Insurance Co.

Field	Value
Carrier Rating	AM Best A · Financial Size VIII
In-Force Property Limit / Agreed Amount	\$34,200,000
Structures Reflected in Policy SOV	12
Collateral / Rebuild Support	13 structures, including the clubhouse
Schedule Gap	Clubhouse is evidenced in collateral/rebuild support but not reflected as scheduled in the policy SOV
Updated Rebuild-Cost Support	\$38,000,000
Flood Determination	Updated FZD/SFHDF on file for all structures (B3, B4, B7, B9, B11 identified as SFHA)
Flood Insurance Evidence	Present for B3, B7, B11 · insurance evidence missing for B4, B9
Mortgagee / Loss Payable (as submitted)	Gulfstream Community Bank (<i>prior lender</i>)

Presenter note: *"This is the insurance as it stands today. The carrier is Meridian, AM Best A, Financial Size VIII — rating reviewed and within acceptable range for this review. But three things are already visible: the schedule shows 12 structures, not the 13 on the collateral; flood evidence is missing on two of the SFHA buildings; and the mortgagee still names the prior lender. Each of those becomes a condition. Jazz surfaced all of it before Nathan opened the file."*

Build note (carrier): state the carrier rating as fact (AM Best A, Financial Size VIII) with the assessment "rating reviewed — within acceptable range"; avoid subjective words like "strong" that invite rating-detail questions. Acceptable-insurers benchmark: Freddie Mac Multifamily Guide Chapter 31 acceptable-insurers section.

Build note: every figure here must match the Highlights condition cards exactly — \$34.2M, 12-vs-13 schedule, \$38.0M rebuild support, B4/B9 flood gap, Gulfstream mortgagee. This summary is the loan-tab "evidence" view; the Highlights cards are the "action" view; they must reconcile to the same ledger. Do NOT show a "\$3.8M shortfall"

headline here either — show the figures, let the schedule-mismatch framing carry it (per Stage 1 Condition 3 discipline).

LOAN & COLLATERAL TAB ACTIONS

[**Open Documents**] → moves to Documents tab [**Open Highlights**] → moves to Highlights tab

[[TAB]]: DOCUMENTS

(A supporting drilldown inside the Solmara Bay file, reached from Highlights. This tab matters because the document-chase proof point lives here: from the named-insured condition on Highlights, Nathan comes here, requests the Letter of Explanation, it comes back, it's uploaded, Jazz reads it and brings him what it found, and Nathan confirms the condition clears — the demo's payoff moment.)

TAB HEADER

DOCUMENTS Insurance package organized by Jazz

Status badge: Classified and indexed

Subtitle: All submitted insurance documents are classified into file categories and linked to the review. New documents uploaded here can update Jazz's assessment, prepare a condition for Nathan's confirmation, or create a new review item.

Build note (status chips): each document section shows a status chip so the tab reads at a glance — one of: **Classified · Linked to Condition · Evidence Missing · Awaiting Broker · Ready for Nathan Confirmation**. (Mirrors the CA demo's visual discipline; makes the tab buildable for Divesh.)

Presenter note: *"Jazz classified the broker's insurance package and mapped each document to the buildings, perils, and conditions it's evidence for. This is also where the file gets cured — when the letter of explanation comes back, it's uploaded here, Jazz classifies and reads it, and Nathan confirms whether it clears the condition."*

SECTION 1 — POLICY & COVERAGE EVIDENCE

Included documents:

- Evidence of Commercial Property Insurance (certificate)
- Full bound property policy + endorsements (Meridian Specialty)
- Statement of Values (SOV)
- Agreed-value endorsement

Status: Classified · Linked to Condition (Property Coverage Adequacy + Lender Interest & Mortgagee) · **updated SOV/coverage Requested · not returned in demo**

Extracted by Jazz: Named insured (Lindover) · mortgagee (Gulfstream) · property limit \$34.2M · agreed amount \$34.2M · SOV structure count (12)

Used for: Mortgagee condition + SOV stale-vs-collateral condition

Benchmark (drawer): Freddie Mac Multifamily Guide §31.5 (property damage) · §31.2(e) (mortgagee clause) — representative public benchmarks; production maps to the client's insurance underwriting guidelines

*Condition-3 framing note (on screen): Jazz does not treat \$34.2M vs. \$38.0M as a standalone numeric failure. It treats the **12-structure SOV vs. 13-structure collateral schedule** as the condition, with the coverage basis routed to Nathan.*

Presenter note: "The property evidence and the full policy are here. Jazz reads the bound policy, not just the certificate — that's where it caught that the SOV schedules 12 structures while the collateral has 13, and that the mortgagee still names Gulfstream."

SECTION 2 — FLOOD EVIDENCE

Included documents:

- Updated Flood Zone Determination (FZD) / Standard Flood Hazard Determination Form (SFHDF) — **on file for all structures**; identifies B3, B4, B7, B9, B11 as SFHA
- NFIP flood declarations — B3, B7, B11 (on file)
- Flood **insurance** evidence for B4, B9 — **not on file** (*this is the Flood Compliance condition*)

Status: Classified · Linked to Condition · Evidence Missing (B4, B9) · **Requested · not returned in demo** · *determination present for all; insurance evidence missing for B4 and B9*

Extracted by Jazz: FZD/SFHDF date · SFHA buildings (B3, B4, B7, B9, B11) · flood declarations matched to B3/B7/B11 · no flood insurance evidence for B4/B9

Used for: Flood Compliance condition

*Clarity note (on screen): the flood **determination** is present for every structure; what's missing is the flood **insurance** evidence for B4 and B9. The determination (§22.6 SFHDF) establishes SFHA status; the separate §22.3 requirement is to carry flood insurance on SFHA buildings.*

Presenter note: "Jazz consumed the updated flood determination and mapped it to the building schedule. The determination itself is on file for every structure — that's not the

gap. The gap is the flood insurance: it's evidenced for three of the five SFHA buildings, but missing for B4 and B9, which the updated determination newly identified. That's the flood condition."

Build note: show the FZD/SFHDF as a consumed *result on file*. NFIP declarations present for B3/B7/B11, absent for B4/B9 — this is what makes the Flood Compliance condition internally consistent with the building schedule in the Loan & Collateral tab.

SECTION 3 — NAMED INSURED / ENTITY SUPPORT

Included documents:

- Named-insured evidence (as submitted: names sponsor Lindover)
- Sponsor master / blanket property program **schedule excerpt — received, but Solmara Bay Owner LLC / Solmara Bay Apartments not clearly matched to the borrowing entity**
- **Letter of Explanation (LOE)** — *requested to bridge the entity/schedule ambiguity; arrives during the demo*

Status: Classified · Linked to Condition · Awaiting Broker → Ready for Nathan Confirmation (*this is the document-chase proof point — the one condition that clears live*)

Extracted by Jazz: Named insured = Lindover Residential Group LLC · borrower = Solmara Bay Owner LLC · master-program support = pending → received during demo

Used for: LOE confirmation workflow (named-insured condition)

Benchmark (drawer): Freddie Mac Multifamily Guide §31.2(d) (named insured) · §31.3 (blanket / master policies) — master/blanket is an acceptable structure but the borrower's coverage must be documented

Presenter note: *"Here's the nuance Jazz caught: the sponsor's master-program schedule excerpt is on file, but it doesn't clearly match Solmara Bay Owner LLC — the borrowing entity — to the covered assets. A master program existing isn't the same as the borrower being documented as covered. So Jazz drafts a request for a letter of explanation to bridge that gap. Nathan sends it, it comes back, Jazz reads it, and Nathan confirms whether it — plus the schedule/endorsement reference — is sufficient. Jazz prepares; Nathan decides."*

SECTION 4 — LENDER / MORTGAGEE SUPPORT

Included documents:

- Mortgagee / lender's loss-payable endorsement (as submitted: names Gulfstream)

- Revised mortgagee endorsement naming JPMorgan Chase Bank, N.A., ISAOA/ATIMA — *requested*

Status: Classified · Linked to Condition · **Requested · not returned in demo**

Extracted by Jazz: Current mortgagee = Gulfstream Community Bank · required mortgagee = JPMorgan Chase Bank, N.A., ISAOA/ATIMA

Used for: Lender / loss-payable correction (mortgagee condition)

Benchmark (drawer): Freddie Mac Multifamily Guide §31.2(e) (mortgagee clause / lender's loss payable)

Presenter note: *"The mortgagee correction is tracked here too — Jazz drafts the request for a revised endorsement naming JPMorgan Chase, and when it returns it's uploaded and checked."*

SECTION 5 — VALUATION & SUPPORTING EVIDENCE

Included documents:

- Appraisal / replacement-cost extract (supports the \$38.0M rebuild figure)
- Certificate of Liability Insurance (ACORD 25 — liability evidence)
- Prior-policy and renewal correspondence

Status: Classified · Linked to Supporting Categories

Extracted by Jazz: Updated rebuild-cost support = \$38.0M · collateral structures = 13 (incl. clubhouse) · liability evidence on file (ACORD 25)

Used for: Rebuild-cost basis + collateral/SOV mismatch (coverage condition)

DOCUMENTS TAB — UPLOAD AREA

Section header: Upload New Document

Primary CTA: [Upload Document]

Helper text: Upload any new document into the file. Jazz will classify it, determine which part of the insurance file it affects, check it against any open conditions, and prepare an updated assessment for Nathan's confirmation.

DOCUMENTS TAB — MAINLINE STORY MOMENT (the live clear)

The Letter-of-Explanation moment (this is today's demo payoff — one condition clears live):

- Nathan clicks [Upload Document] in the Documents tab

- Nathan uploads the returned **Letter of Explanation** (PDF)
- Jazz classifies it as a Letter of Explanation
- Jazz links it to the **Named Insured & Insured Entity** condition
- Jazz reads the LOE and extracts that Solmara Bay Owner LLC / Solmara Bay Apartments are **represented as scheduled** under Lindover's master property program, **and that the LOE references the supporting schedule / endorsement** that ties the borrowing entity to coverage
- System message: *"Letter of Explanation reviewed. Solmara Bay is represented as covered under the sponsor's master property program, with referenced schedule/endorsement support. Nathan confirmation required."*
- The condition's tag flows **SUPPORT REQUIRED → READY FOR CONFIRMATION**; Nathan reviews the LOE and the referenced schedule/endorsement support, and confirms it is sufficient to document borrower/property coverage, then clicks **[Confirm Named Insured Coverage]**
- On Nathan's confirmation the tag flows to **COMPLETE**; open conditions counter updates: **4 → 3**
- The Named Insured condition flips to **Cleared** in Highlights and in JazzAssessment

Build note: this is the single live-clear the demo shows (per the Stage 1 end-state decision: Nathan works all four; the LOE round-trip clears live; the file ends at **Broker Cure Pending** with three still out for cure). The named-insured/LOE flow is the chosen live moment because it's the cleanest document-chase round-trip. The other three conditions (mortgagee, coverage, flood) are requested and tracked but do not clear in the 20-minute demo — their requests are drafted and sent, and the file ends Broker Cure Pending. Do not show all four clearing.

Presenter note: *"Watch this — this is the proof point. Nathan uploads the letter of explanation. Jazz reads it and brings him what it found — Solmara Bay represented as covered under the sponsor's program. Nathan confirms, and the condition clears — four becomes three. Jazz did the document-chase and the read; Nathan made the call. The other three are requested and on their way back; in the real workflow they resolve the same way."*

DOCUMENTS TAB ACTIONS

[Upload Document] [Open Highlights] [Open JazzAssessment]

PRESENTER TRANSITION OUT OF DOCUMENTS: *"Now let's look at how Jazz assessed the whole insurance package — what it cleared on its own, and the four conditions it brought to Nathan."* → JazzAssessment.

JPMorgan Insurance Compliance Demo — Build Script (for Divesh)

JazzAssessment Tab — PART A: Cleared Categories + Verified Inputs

What this file covers: the JazzAssessment header, the unified **Review Categories** list, the design direction (global + per-category), and the full drill-in content for the **8 cleared categories** (2 verified inputs + 6 within-requirement). **The 4 condition panels are NOT in this file** — they're Part B (built next, after this clears QA).

Where this sits: JazzAssessment is the last tab in the Solmara Bay file (Loan & Collateral · Documents · Highlights · **JazzAssessment**). Demo navigation lands on Highlights first; JazzAssessment is where Nathan sees Jazz's prepared first-pass assessment, the categories with no open condition, and the four categories requiring his judgment.

Locked counters (from the architecture):

- On open: **12 review categories assessed · 8 cleared · 4 open conditions**
- After the LOE live-clear: **12 review categories assessed · 9 cleared · 3 open conditions**

Vocabulary (locked): Verified · Within Requirement · Condition · Prepared by Jazz · Ready for Nathan Confirmation · Cleared by Nathan. Never "cleared by Jazz," "issue," "flag," "auto-approved." Jazz **prepares / assembles / reviews / consumes**; Nathan **confirms / decides / clears**.

Canonical ledger (must match Stage 1 + Loan/Documents files): \$32.0M refinance · Solmara Bay Owner LLC (borrower) · Lindover Residential Group LLC (sponsor) · Gulfstream → JPMorgan Chase, N.A. · 244 units · 13 structures · 5 SFHA (B3, B4, B7, B9, B11) · \$34.2M in-force limit · \$38.0M rebuild support · Meridian Specialty Insurance Co. (AM Best A, Financial Size VIII) · LN-CRE-2026-0418 · closing 18 days.

DESIGN DIRECTION (ideation for Divesh — not prescriptive)

The goal is a screen that proves "Jazz ran the whole first-order insurance review, most of it is clean, and four things need Nathan" — without overwhelming. Big fonts, headline-first, low cognitive load (Eshwar's bar). Here's a component direction; treat as a starting point, not a spec.

Overall layout — two zones:

1. **Left nav (state-sorted taxonomy)** — a slim vertical rail listing all review categories, sorted by *state* (cleared above, conditions below), not alphabetically. State-sorting tells the "most of the review is settled, here's what needs Nathan" story at a glance. Cleared items collapsed/quiet; condition items emphasized.
2. **Right pane (the active category)** — when Nathan clicks a category in the nav, its drill-in renders here.

Component suggestions by zone:

- **Top summary band — use a compact counter strip, NOT big bento tiles.**
Three small inline counters (12 review categories assessed · 8 cleared · 4 open conditions). Keep it one quiet line so the conditions are the visual focus, not the dashboard. *(Resist the urge to make these large cards — that would compete with the conditions for attention.)*
- **Cleared categories — use a collapsed list or low-emphasis "chips," not full cards.** The 2 verified inputs + 6 within-requirement categories should read as a calm, scannable green/neutral list. Each row: category name · status pill · one-line summary. Collapsed by default; click to expand the drill-in. *Bento cards are the wrong call here* — 8 cleared bento cards would visually shout "look at all this" and bury the 4 conditions. The cleared categories should feel **settled and quiet**, the conditions should feel **active**.
- **The 4 condition categories (Part B) — these get the visual weight.** Expanded by default, amber/emphasized, condition nested beneath. This is where bolder treatment belongs.
- **Drill-in panel (right pane) — a workpaper, not a script.** Within one panel, in order: **Header** (category title · status chip · one-line conclusion) · **Evidence grid** (3–5 extracted facts, each value + source) · **Requirement check** (requirement · required · extracted · result) · **Source trail + action row** (source links + **Guideline Basis** pill). No visible Review Rationale paragraph. The panel should read like an insurance review worksheet. One panel, vertical flow, generous whitespace.
- **Optional grouping for the within-requirement rows — a light visual sub-grouping helps scanning** without adding cards: e.g. a thin label splitting "Core coverages" (policy/carrier, business income, liability) from "Catastrophe & environmental" (windstorm, ordinance/law) from "Evidence hygiene." Subtle dividers, not boxes.

What to avoid (INTERNAL build guidance — do NOT render any of this text on screen): 8+ bento cards on one screen · large equal-weight tiles for cleared and open alike (flattens the hierarchy) · dense paragraphs in the nav · more than one "dashboard-looking" element competing with the conditions. The screen should read: *quiet cleared list* → *loud conditions* → *one clean drill-in at a time*.

CATEGORY-LEVEL DESIGN DIRECTION (per-row / per-panel — for Divesh)

Global philosophy above; here's what each category type should look like at the row and panel level.

Category	Row treatment	Detail panel	Next Step / Guideline Basis
Loan and Collateral Profile	Quiet cleared row	Compact context table	View Loan & Collateral · (no guideline basis needed)
Flood Determination Mapping	Quiet cleared row + "determination ≠ insurance" note	Building-to-zone mapping table	View Flood Determination · Guideline Basis: 12 CFR §22.6
Policy Term and Carrier Eligibility	Cleared row	Extracted: term, carrier, rating, threshold	View Declarations · Guideline Basis
Rental Income Protection	Cleared row	Coverage basis, rental value insured, indemnity period	View Policy Coverage · Guideline Basis §31.6
Liability and Additional Insured Review	Cleared row	CGL limits, additional insured, ACORD source	View Liability Certificate · Guideline Basis §31.16
Windstorm and Named Storm Coverage	Cleared row + "separate from flood" note	Wind coverage, deductible, storm-surge separation	View Windstorm Provisions · Guideline Basis §31.7
Ordinance and Law Coverage	Cleared row	Coverage parts A/B/C + limits	View Endorsement · Guideline Basis §31.12

Category	Row treatment	Detail panel	Next Step / Guideline Basis
Evidence Currency and Premium Status	Cleared row	Certificate date, cancellation notice, proof of payment	View Evidence · Guideline Basis §31.2(f)/(g)
Condition rows (9–12)	Amber / emphasized	Built in Part B only	No full detail in Part A

Parent chip **Cleared** does not mean "AI approved" — it means no open condition remains in that category (Nathan confirmation applied where required). Carry this into Part B.

Build guardrail: this category-level design direction is *INTERNAL* only. Do not render the table's row labels or shorthand detail-panel phrases (e.g. "Extracted: term, carrier, rating") on screen — the visible panel uses the full workpaper structure with professional names.

[[TAB]]: JAZZASSESSMENT — HEADER & TAXONOMY

A) HEADER

Page title: JazzAssessment

Subtitle (on screen): 12 categories assessed. 8 cleared. 4 need Nathan.

(Build note — longer form if needed: 12 review categories assessed; 8 cleared; 4 open conditions require Nathan before insurance clearance can issue.)

Summary counters (one quiet strip — not big tiles):

12 review categories assessed · 8 cleared · 4 open conditions

i tooltip on "cleared": **Cleared** = no open condition remains for this review category; Nathan confirmation applied where required.

(After the LOE live-clear this updates to: 12 assessed · 9 cleared · 3 open conditions.)

Category → condition mapping (small contextual line beneath the counters):

Open categories: Mortgagee and Loss Payable Review — Mortgagee Clause · Borrower Coverage Verification — Named Insured · Property Schedule and Coverage Adequacy — Stale SOV and Missing Scheduled Structure · Federal Flood Insurance Compliance — Missing Flood Evidence (B4, B9)

Presenter note: "Nathan lands on JazzAssessment and sees the whole insurance review in one view. Jazz didn't just hunt for problems — it prepared a full first-pass

assessment. Eight categories are cleared, four need his judgment. 'Cleared' here means the category has no open condition after Jazz's assessment and Nathan's confirmation where it's required — not that Jazz approved it on its own. Then four things need action. Once he resolves them, insurance clearance can issue."

B) THE REVIEW CATEGORIES LIST

The 12 Review Categories:

#	Review Category	Parent Status	Summary
1	Loan and Collateral Profile	✓ Cleared	Borrower, sponsor, \$32.0M refinance, 13-structure collateral schedule assembled
2	Flood Determination Mapping	✓ Cleared	FZD/SFHDF mapped five SFHA buildings; insurance evidence assessed separately
3	Policy Term and Carrier Eligibility	✓ Cleared	Policy term active for closing review · Meridian Specialty, AM Best A / Financial Size VIII, reviewed
4	Rental Income Protection	✓ Cleared	12-month rental value coverage evidenced (\$4.8M)
5	Liability and Additional Insured Review	✓ Cleared	CGL \$1M/\$2M evidenced (ACORD 25); lender additional insured
6	Windstorm and Named Storm Coverage	✓ Cleared	Wind / named-storm included; 5% deductible reviewed
7	Ordinance and Law Coverage	✓ Cleared	Coverage A/B/C evidenced
8	Evidence Currency and Premium Status	✓ Cleared	Certificate current (06/10/2026); 10/30 cancellation notice; premium paid/current confirmed
9	Mortgagee and Loss Payable Review	⚠ Condition Open	Mortgagee names prior lender
10	Borrower Coverage Verification	⚠ Condition Open	LOE needed for borrower coverage

11	Property Schedule and Coverage Adequacy	⚠ Condition Open	SOV shows 12; collateral shows 13
12	Federal Flood Insurance Compliance	⚠ Condition Open	B4/B9 flood evidence missing

Build note: condition rows (9–12) use compact one-line summaries in Part A only. Their full evidence grid, requirement check, Guideline Basis pill, and state-aware CTA appear in Part B — do not overbuild them here.

After the LOE live-clear, row 10 updates:

Review Category Parent Status

10 Borrower Coverage Verification  **Cleared**

*Counter moves from 8 cleared · 4 open conditions → **9 cleared · 3 open conditions**.*

Build note (parent chips): only two parent-level chips — **Cleared** and **Condition Open**. **UI definition for Divesh: Cleared = no open condition remains for this review category; Nathan confirmation applied where required.** (Rows 1–2 read Verified inside their drill-in but Cleared at the parent row — "Cleared" is the parent-row shorthand for both Verified and Within Requirement.) Do not expose Verified / Within Requirement / Prepared by Jazz at the parent-row level; those are drill-in states. The four condition rows (9–12) show only a one-line condition summary here; their full panels are Part B. There is **no "Supplemental Checks / Additional Reviewed Categories" section** on this screen.

Drill-in behavior:

- Click any **Cleared** row → right pane shows a read-only **workpaper panel**: Header (title · status · conclusion) · Evidence grid (fact · value · source) · Requirement check (requirement · required · extracted · result) · Source trail + Guideline Basis pill. (Inside, the chip may read Verified or Within Requirement — that finer state lives in the panel.)
- Click any **Condition Open** row → right pane shows the work Jazz prepared plus the open condition card with its state-aware CTA (*Part B*).

Presenter note: *"Click into any cleared category — Jazz reviewed the evidence, checked it against the requirement, and reached a conclusion. That's the work Nathan would have done by hand. Click into a condition — same depth of work, but Jazz hit a point where evidence isn't sufficient or a judgment is needed. That's where Nathan steps in."*

DRILL-IN CONTENT — CLEARED CATEGORIES (8) — WORKPAPER PANELS

Every cleared category renders the same **workpaper** structure in the right pane — NOT a narrated explanation: (1) **Header**: category title · status chip · one-line conclusion · (2) **Evidence grid**: 3–5 extracted facts, each with value + source · (3) **Requirement check**: requirement · required · extracted · result · (4) **Source trail + bottom action row**: source links + **Guideline Basis** ▾ pill.

No visible "Review Rationale" paragraph. Presenter notes below each panel are **INTERNAL** only — not rendered on screen. Rows 1–2 are **inputs** (banner reads Verified; their "requirement check" is a **Review basis** table, since an input isn't a coverage that passes or fails). Rows 3–8 are coverage categories (banner reads Within Requirement; full requirement-status check).

Build guardrail: the right panel must feel like an insurance review worksheet, not a script. Keep prose out; lead with the conclusion line, then tables.

C) CLEARED CATEGORIES

CATEGORY 1 — LOAN AND COLLATERAL PROFILE

✅ Cleared · Borrower, sponsor, loan amount, and 13-structure collateral schedule verified for insurance review.

Evidence

Extracted field Value		Source
Borrower	Solmara Bay Owner LLC	Loan summary
Sponsor	Lindover Residential Group LLC	Sponsor records
Loan amount	\$32.0M refinance	Loan summary
Property	244 units	Collateral schedule
Structures	12 residential (B1–B12) + 1 clubhouse Building schedule	

Review basis (input — not a coverage that passes or fails)

Basis	Expected	Assembled	Result
Collateral context	Borrower, sponsor, loan, structures	All assembled	Verified
Building schedule	Per-structure schedule	13 structures	Verified

[[View Loan & Collateral](#)] · [[View Building Schedule](#)] (context input — no Guideline Basis needed)

Presenter note (internal): "Jazz assembled the whole deal context — borrower, sponsor, 13 structures. Nathan didn't compile this; the file arrived and Jazz organized it."

CATEGORY 2 — FLOOD DETERMINATION MAPPING

✓ Cleared · FZD/SFHDF mapped five SFHA buildings; flood insurance evidence assessed separately.

Evidence

Extracted field	Value	Source
SFHA buildings	B3, B4, B7, B9, B11	FZD/SFHDF
SFHA zone	AE	FZD/SFHDF
Non-SFHA structures	B1, B2, B5, B6, B8, B10, B12, Clubhouse	FZD/SFHDF
Insurance status	Not assessed here	Federal Flood Insurance Compliance category

Review basis (input — determination, not insurance)

Basis	Expected	Extracted	Result
Flood determination	SFHDF present and retained	Updated FZD/SFHDF on file	Verified
Building mapping	Per-structure mapping	13 structures mapped	Verified

⚠ **Determination on file ≠ flood insurance in place** — whether each SFHA building carries insurance is assessed under **Federal Flood Insurance Compliance** (Part B).

[[View Flood Determination](#)] · [[View Building Schedule](#)] · [[Guideline Basis ▼](#)]

Guideline Basis hover:

- **Client guideline:** Insurance Underwriting Guidelines — flood determination requirement
- **Public reference:** 12 CFR §22.6 (required use/retention of the Standard Flood Hazard Determination Form to determine SFHA status)
- **Source paraphrase:** The bank must use and retain the SFHDF to determine whether collateral is in an SFHA.

- **Why Jazz mapped it:** The determination is the artifact establishing which buildings require flood insurance; Jazz maps it per building.
- **Review result:** Verified
- *The separate 12 CFR §22.3 flood-insurance requirement is assessed under Federal Flood Insurance Compliance (Part B).*

Presenter note (internal): "Jazz consumed the updated determination and mapped all five flood-zone buildings. But having the determination isn't the same as having the insurance — that's exactly where the flood condition lives."

(Rows 3–8) COVERAGE CATEGORIES — banner: Within Requirement

CATEGORY 3 — POLICY TERM AND CARRIER ELIGIBILITY

 **Cleared** · *Policy is active through closing; carrier meets eligibility threshold.*

Evidence

Extracted field Value		Source
Policy period	03/01/2026 – 03/01/2027	Property declarations
Closing window	18 days	Loan file
Carrier	Meridian Specialty Insurance Co. Policy declarations	
AM Best rating	A / Financial Size VIII	Carrier rating reference
Carrier type	Eligible carrier	Carrier reference

Requirement check

Requirement	Required	Extracted	Result
Policy currency	Active through closing	Active through 03/01/2027	Within Requirement
Carrier eligibility	AM Best A– / VIII or better	A / VIII	Within Requirement

[View Declarations] · [Guideline Basis ▼]

Guideline Basis hover:

- **Client guideline:** Insurance Underwriting Guidelines — carrier acceptability & policy currency

- **Public reference:** Freddie Mac Multifamily Guide §31.4 (acceptable insurers)
- **Source paraphrase:** Carrier must meet the acceptable-insurer rating/size requirements (admitted, or acceptable non-admitted/surplus-lines per lender guideline); policy must be in force.
- **Why Jazz mapped it:** Carrier rating (AM Best A/VIII) and policy term are the evidence used to confirm acceptability.
- **Review result:** Within Requirement
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines.*

Presenter note (internal): "First thing Jazz confirms — is the policy in force and the carrier acceptable. Meridian, A-rated, term covers closing. Clean."

JPMorgan Insurance Compliance Demo — Build Script (for Divesh)

JazzAssessment — Glass-Box Evidence Board (Policy Term and Carrier Eligibility)

What this is: a special right-panel treatment for **one** cleared category — **Policy Term and Carrier Eligibility** — that turns the standard workpaper evidence grid into an interactive **glass-box evidence board**. Each extracted data point becomes a small card; on hover/click it expands to show source document, extracted text/value, requirement tested, Jazz interpretation, and result.

Why only this one: the glass-box is a deliberate "wow" moment — the trust layer that proves Jazz can show its work down to the source. It earns its weight by being the exception, not the rule. Every other cleared category keeps the standard Part A workpaper (evidence grid + requirement check). Use this pattern for Policy Term and Carrier Eligibility first; we can decide later whether a second category deserves it.

What stays the same: the header (title · status · conclusion), the requirement-check table (now reading as the *summary* of the cards), the source trail, and the Guideline Basis pill. The glass-box replaces only the flat evidence grid.

Vocabulary (locked, from Part A): banner chip =  Within Requirement (one chip at top); card status chips and table result cells are plain text (Verified / Within Requirement); no "Pass." Data-point cards explain **source & extraction**; the Guideline Basis pill explains **requirement logic** — keep those two separate.

DESIGN DIRECTION — GLASS-BOX EVIDENCE BOARD (for Divesh)

The goal: Nathan doesn't just see that Jazz cleared the category — he sees which data points were extracted, where each came from, what rule it was tested against, and why the result holds. A trust layer, revealed on demand.

Layout:

- **Header** at top (title · single banner chip · one-line conclusion) — unchanged from the workpaper.
- **Evidence board** replaces the flat evidence grid: a row/grid of **small data-point cards** (5 cards for this category). Quiet by default — value + source + status, nothing more. The board should feel calm, not busy.
- **Requirement check** table sits below the board as the **summary test** — it reads as "here's what those data points proved."
- **Bottom action row:** source links + Guideline Basis pill.

Card behavior:

- **Resting state (front of card):** field name · extracted value · status chip · source label. Compact. Scannable at booth distance.
- **Hover / click (expanded):** the card grows (or flips, or opens an inline detail tray — Divesh's call) to reveal: **Source document · Extracted text/value · Requirement tested · Jazz interpretation · Result · link to source.**
- One card open at a time is cleaner than all-expanded; consider click-to-pin so Nathan can read one without losing the board.

What to avoid: all cards expanded by default (overwhelming) · putting requirement logic on the card (that's the Guideline Basis pill's job — the card is about source & extraction) · more than ~5 cards — the five here (Policy Period · Closing Window · Carrier · AM Best Rating · Eligibility Conclusion) are the set; do not add policy number, carrier address, or NAIC, which would make the wow moment noisy · bento-style heavy borders that make the board louder than the conditions elsewhere on screen.

Build guardrail: this is an enhancement of ONE category's right panel. It does not change the left nav, the parent chip (still Cleared), the counters, or any other category. From the category list, Policy Term and Carrier Eligibility still reads as a normal Cleared row; the glass-box only appears when its drill-in opens.

(GLASS-BOX)

Header

Policy Term and Carrier Eligibility ·  Within Requirement *Policy is active through closing; carrier meets eligibility threshold.*

Evidence Board — 5 data-point cards

Each card: front = field · value · status · source. Hover/click = the detail block beneath it.

CARD 1 — Policy Period

03/01/2026 – 03/01/2027 · Verified Source: *Property declarations*

Expanded detail (hover/click):

- **Source document:** Property policy declarations
 - **Extracted value:** Effective 03/01/2026; expires 03/01/2027
 - **Requirement tested:** Policy must remain active through the closing date
 - **Jazz interpretation:** Term runs a full 12 months and covers the closing window (closing in 18 days)
 - **Result:** Within Requirement — active through 03/01/2027
 - **[View Declarations]**
-

CARD 2 — Closing Window

18 days · Verified Source: *Loan file*

Expanded detail (hover/click):

- **Source document:** Loan file — closing schedule
 - **Extracted value:** Closing window — 18 days, per loan file
 - **Requirement tested:** Whether the policy term covers the closing window
 - **Jazz interpretation:** Closing date falls inside the active policy period
 - **Result:** Verified — closing within the active term
 - **[View Loan File]**
-

CARD 3 — Carrier

Meridian Specialty Insurance Co. · Verified Source: *Policy declarations*

Expanded detail (hover/click):

- **Source document:** Property policy declarations
 - **Extracted value:** Carrier — Meridian Specialty Insurance Co.
 - **Requirement tested:** Carrier identity must match the rated entity for eligibility
 - **Jazz interpretation:** Matched the carrier name on the policy to the carrier rating reference
 - **Result:** Verified — carrier identified and matched
 - **[View Declarations]**
-

CARD 4 — AM Best Rating

A / VIII · Within Requirement *Source: Carrier rating reference*

Expanded detail (hover/click):

- **Source document:** Carrier rating reference
 - **Extracted value:** AM Best A · Financial Size VIII
 - **Requirement tested:** Minimum AM Best A- / Financial Size VIII or better
 - **Jazz interpretation:** A / VIII meets the minimum rating and size threshold
 - **Result:** Within Requirement
 - **[View Carrier Rating]**
-

CARD 5 — Eligibility Conclusion

Eligible carrier · Within Requirement *Source: Carrier rating reference*

Expanded detail (hover/click):

- **Source document:** Carrier rating reference
- **Extracted value:** AM Best A · Financial Size VIII
- **Jazz interpretation:** Rating and size satisfy the mapped carrier eligibility requirement
- **Result:** Within Requirement
- **[View Carrier Rating]**

(Note: the eligibility rule itself — threshold, lender guideline, Freddie §31.4 — lives in the Guideline Basis pill, not on this card. The card carries the conclusion; the pill carries the rule.)

Requirement Check (summary of the evidence board)

Requirement	Required	Extracted	Result
Policy currency	Active through closing	Active through 03/01/2027	Within Requirement
Carrier eligibility	AM Best A- / VIII or better	A / VIII	Within Requirement

Bottom action row

[View Declarations] · [View Carrier Rating] · [Guideline Basis ▼]

Guideline Basis hover:

- **Client guideline:** Insurance Underwriting Guidelines — carrier acceptability & policy currency
- **Public reference:** Freddie Mac Multifamily Guide §31.4 (acceptable insurers)
- **Source paraphrase:** Carrier must meet the acceptable-insurer rating/size requirements (admitted, or acceptable non-admitted/surplus-lines per lender guideline); policy must be in force.
- **Why Jazz mapped it:** Carrier rating (AM Best A/VIII) and policy term are the evidence used to confirm acceptability.
- **Review result:** Within Requirement
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines.*

Presenter note (internal): "This is the glass box. Nathan doesn't just see 'carrier — cleared.' He clicks the rating card and sees the source document, the exact extracted value, the rule it was tested against, and why Jazz concluded it's within requirement. Every data point opens like that. The category cleared because each of these did — and Nathan can verify any one of them in two clicks."

CATEGORY 4 — RENTAL INCOME PROTECTION

✓ Cleared · 12-month rental-value coverage evidenced.

Evidence

Extracted field	Value	Source
Coverage type	Business income / rental value	Property policy
Coverage basis	Actual loss sustained	Policy coverage form
Rental value	\$4.8M annual rental value	Broker worksheet / policy
Indemnity period	12 months	Policy declarations

Requirement check

Requirement	Required	Extracted	Result
Rental-value coverage	≥12 months rental value / EGI	\$4.8M annual rental value	Within Requirement
Indemnity period	Min. 12 months	12 months	Within Requirement

[[View Policy Coverage](#)] · [[Guideline Basis ▼](#)]

Guideline Basis hover:

- **Client guideline:** Insurance Underwriting Guidelines — business income / rental value
- **Public reference:** Freddie Mac Multifamily Guide §31.6 (business income / rental value)
- **Source paraphrase:** Coverage should support 12 months of rental value / EGI (or equivalent broker-worksheet basis) to protect loan-supporting income during a covered loss.
- **Why Jazz mapped it:** The loan is repaid from rents; rental-value coverage is the evidence that income is protected.
- **Review result:** Within Requirement
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines.*

Presenter note (internal): "Rental-value coverage protects the income the loan is repaid from if units go offline after a loss. Present and reviewed."

CATEGORY 5 — LIABILITY AND ADDITIONAL INSURED REVIEW

✅ Cleared · *CGL limits and additional-insured status meet requirement.*

Evidence

Extracted field	Value	Source
Coverage	Commercial General Liability	ACORD 25
Limit	\$1M occurrence / \$2M aggregate	ACORD 25
Additional insured	Lender named	ACORD 25
Evidence	Certificate on file	Documents tab

Requirement check

Requirement	Required	Extracted	Result
CGL limit	Min. \$1M occ / \$2M agg	\$1M / \$2M	Within Requirement
Additional insured	Lender named	Present	Within Requirement

[[View Liability Certificate](#)] · [[Guideline Basis](#) ▼]

Guideline Basis hover:

- **Client guideline:** Insurance Underwriting Guidelines — general liability & additional insured
- **Public reference:** Freddie Mac Multifamily Guide §31.16 (general liability)
- **Source paraphrase:** CGL coverage required at minimum limits; lender named additional insured.
- **Why Jazz mapped it:** ACORD 25 limits and the additional-insured line are the evidence used to confirm the requirement.
- **Review result:** Within Requirement
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines.*

Presenter note (internal): "Liability coverage and the bank's additional-insured status — both confirmed from the ACORD 25."

CATEGORY 6 — WINDSTORM AND NAMED STORM COVERAGE

✅ Cleared · *Wind coverage included; deductible reviewed separately from flood.*

Evidence

Extracted field	Value	Source
Windstorm coverage	Included	Property policy
Named-storm coverage	Included	Policy endorsement
Named-storm deductible	5% of insured value	Deductible schedule
Storm surge	Flood peril, not wind	Policy wording

Requirement check

Requirement	Required	Extracted	Result
Wind coverage	Included or affirmatively covered	Included	Within Requirement
Named-storm deductible	Within lender guideline	5% of insured value	Within Requirement
Flood separation	Storm surge reviewed under flood	Routed to Federal Flood Insurance Compliance	Separated

⚠ **Wind ≠ flood:** clearing windstorm here does not clear flood. B4/B9 flood evidence remains open under Federal Flood Insurance Compliance.

[[View Windstorm Provisions](#)] · [[Guideline Basis](#) ▼]

Guideline Basis hover:

- **Client guideline:** Insurance Underwriting Guidelines — windstorm / named-storm coverage & deductible cap
- **Public reference:** Freddie Mac Multifamily Guide §31.7 (windstorm)
- **Source paraphrase:** Windstorm / named-storm coverage required; named-storm deductible must not exceed the guideline cap.
- **Public-reference threshold:** Named-storm percentage-deductible benchmark ≈ max 7.5% of subject-property TIV; stated minimum limits depend on specific vs. blanket limit structure (Freddie §31.7). The file's 5% is within that benchmark.
- **Why Jazz mapped it:** Coverage inclusion and the 5% deductible are the evidence; storm surge is reviewed under flood, not here.
- **Review result:** Within Requirement
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines.*

Presenter note (internal): "For a Gulf Coast property this matters — named-storm coverage and the deductible, reviewed separately from flood. Storm surge sits under flood, and flood for B4/B9 is still open."

CATEGORY 7 — ORDINANCE AND LAW COVERAGE

✓ Cleared · Coverage A/B/C evidenced.

Evidence

Extracted field Value		Source
Coverage A	Undamaged portion	Ordinance/law endorsement
Coverage B	Demolition cost	Ordinance/law endorsement
Coverage C	Increased construction cost	Ordinance/law endorsement
Limits	Reviewed in policy source	Policy endorsement

Requirement check

Requirement	Required	Extracted	Result
Ordinance/law coverage	A/B/C evidenced where applicable	A/B/C present	Within Requirement

[[View Ordinance-or-Law Endorsement](#)] · [[Guideline Basis ▾](#)]

Guideline Basis hover:

- **Client guideline:** Insurance Underwriting Guidelines — ordinance or law
- **Public reference:** Freddie Mac Multifamily Guide §31.12 (ordinance and law)
- **Source paraphrase:** Ordinance-or-law coverage (parts A/B/C) required where code-upgrade exposure exists.
- **Why Jazz mapped it:** A casualty rebuild across mixed-vintage structures can trigger current-code costs; A/B/C parts are the evidence.
- **Review result:** Within Requirement
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines.*

Presenter note (internal): "Ordinance-or-law covers the extra cost of rebuilding to current code after a loss. Relevant across mixed-vintage buildings. Present and reviewed."

CATEGORY 8 — EVIDENCE CURRENCY AND PREMIUM STATUS

✓ Cleared · Evidence is current; notice language and premium support confirmed.

Evidence

Extracted field	Value	Source
Certificate date	06/10/2026	Certificate
Policy period	03/01/2026 – 03/01/2027	Policy declarations
Cancellation notice	10 days nonpayment / 30 days other	Policy provisions
Premium status	Paid / current	Premium support

Requirement check

Requirement	Required	Extracted	Result
Evidence currency	Current certificate	06/10/2026	Within Requirement
Cancellation notice	10 / 30 days	10 / 30 days	Within Requirement
Premium support	Paid / current	Confirmed	Within Requirement

[View Evidence & Premium Support] · [Guideline Basis ▼]

Guideline Basis hover:

- **Client guideline:** Insurance Underwriting Guidelines — evidence currency, cancellation notice, proof of payment
- **Public reference:** Freddie Mac Multifamily Guide §31.2(f) cancellation clause · §31.2(g) proof of payment
- **Source paraphrase:** Evidence must be current; cancellation-notice periods and proof of premium payment must meet requirement.
- **Why Jazz mapped it:** Certificate date, cancellation language, and premium support are the evidence used to confirm validity.
- **Review result:** Within Requirement
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines.*

Presenter note (internal): "The evidence itself — current, cancellation language right, premium paid. All reviewed. That's the full first-pass: most of the package is clean, and Jazz showed Nathan exactly what it checked."

D) **CATEGORIES WITH OPEN CONDITIONS [WIP]**

CATEGORY 9 — MORTGAGEE AND LOSS PAYABLE REVIEW

Category panel (opens when Nathan clicks the amber row — same workpaper layout as a Part A cleared category)

Mortgagee and Loss Payable Review ·  Condition Open · tag: *QUALIFYING ISSUE*
Mortgagee / loss-payable evidence names the prior lender; Jazz has drafted the corrected protected-party wording for Nathan to accept.

Evidence

Extracted field	Value	Source
Mortgagee on policy	Gulfstream Community Bank (prior lender)	Mortgagee endorsement
Lender's loss payee	Gulfstream Community Bank	Certificate (evidence of insurance)
Financing lender	JPMorgan Chase Bank, N.A.	Loan file (refinance)
Required mortgagee wording	JPMorgan Chase Bank, N.A., ISAOA/ATIMA	JPMorgan Chase insurance instruction

Requirement check

Requirement	Required	Extracted	Result
Mortgagee clause	JPMorgan Chase Bank, N.A., ISAOA/ATIMA	Gulfstream Community Bank	X Condition
Lender's loss payable	Financing lender protected	Gulfstream Community Bank	X Condition
Required wording	JPMorgan Chase Bank, N.A., ISAOA/ATIMA	Not present for JPMorgan Chase	X Condition

Condition

Condition	Prior lender remains named on mortgagee and loss-payable evidence
State	QUALIFYING ISSUE

Condition	Prior lender remains named on mortgagee and loss-payable evidence
Why open	JPMorgan Chase is not evidenced as the protected lender
Prepared by Jazz	Corrected protected-party wording, drafted from lender instruction
Post-request state	Requested · not returned in demo; condition remains open

[[Review Condition](#)] · [[View Mortgagee Endorsement](#)] · [[View Loss-Payable Evidence](#)] · [[Guideline Basis](#) ▾]

Guideline Basis hover:

- **Public reference:** Freddie Mac Multifamily Guide §31.2(e) — standard mortgagee / loss-payable clause concept (the control type)
- **Client guideline:** JPMorgan Chase insurance instruction — mortgagee and lender's loss-payable wording must name JPMorgan Chase Bank, N.A., ISAOA/ATIMA
- **Source paraphrase:** A property policy must carry a mortgagee / lender's loss-payable clause; the client instruction defines who must be named for this transaction.
- **Why Jazz mapped it:** The public benchmark supports the control type; the client instruction defines the beneficiary and exact wording for this transaction.
- **Review result:** Condition Open
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines.*

Presenter note (internal): "Same workpaper as the cleared categories — evidence grid, requirement check — but every test row fails on the protected party: the policy names Gulfstream, the prior lender, where the JPMorgan Chase instruction requires JPMorgan Chase Bank, N.A., ISAOA/ATIMA. Jazz drafted the fix."

Condition detail

Mortgagee Names Prior Lender · QUALIFYING ISSUE LN-CRE-2026-0418 · Solmara Bay Apartments · \$32.0M refinance

 **Nathan decision required — insurance clearance cannot issue until the mortgagee names the financing lender.**

What Jazz Found

Source	Value	Basis
Property policy — mortgagee endorsement	Gulfstream Community Bank	Named mortgagee on the bound policy
Certificate (evidence of insurance)	Gulfstream Community Bank	Named lender's loss payee
Loan file — financing structure	JPMorgan Chase Bank, N.A.	Lender of record on the refinance
Required wording	JPMorgan Chase Bank, N.A., ISAOA/ATIMA	JPMorgan Chase insurance instruction

Nathan Decision (*archetype: Accept drafted correction*)

Jazz already knows the correct protected party — the financing lender (JPMorgan Chase Bank, N.A.) from the loan file, plus the ISAOA/ATIMA wording from the JPMorgan Chase insurance instruction — and has drafted the corrected wording. Nathan's decision is to **accept that drafted correction for the outbound request** — not to apply it to the policy (the carrier must still issue the corrected endorsement).

Jazz proposes

Corrected protected-party wording:

"Mortgagee and lender's loss payee:
JPMorgan Chase Bank, N.A., ISAOA/ATIMA"

Drafted from loan file (financing lender) +
JPMorgan Chase insurance instruction
(ISAOA/ATIMA wording)

Nathan accepts

☒ Accept drafted correction (*default*) —
endorses Jazz's wording for the
outbound carrier/broker request

 Edit wording / add a note (*optional*)
before accepting

What "accept" means here: Nathan endorses Jazz's drafted wording and **opens the editable outbound request modal** — accepting does not itself send anything, and does **not** mark the policy corrected. Sending is a separate click (**Send Request**) inside the modal. The condition stays open until the carrier issues the corrected endorsement, Jazz re-reads it, and Nathan confirms.

Accept-vs-Send sequencing (*two distinct steps — accepting never sends*)

Step	Meaning	State impact
Accept Drafted Correction	Nathan accepts Jazz's proposed wording for the outbound request	Opens editable request modal; condition still open
Send Request (inside modal)	Nathan sends the broker/carrier request from the modal	State becomes Requested · not returned ; condition still open
Corrected endorsement returned	Jazz re-reads returned evidence	Ready for Confirmation
Nathan confirms	Evidence accepted	Cleared by Nathan

[View Mortgagee Endorsement] · [View Loss-Payable Evidence] — review the current endorsement and Jazz's drafted correction before accepting

[Accept Drafted Correction] (primary CTA — stages Jazz's wording and opens the editable request modal; does not send)

After Nathan accepts and sends: **Requested · not returned in demo**. The **condition remains open** — accepting the correction and sending the request does not reissue the policy or clear the condition. Open conditions remain 4. Only Borrower Coverage Verification changes the counter (8 cleared / 4 open → 9 cleared / 3 open).

Corrected Endorsement Request — modal (opens from the [Accept Drafted Correction] CTA — not a second decision CTA)

When Nathan clicks **[Accept Drafted Correction]**, a modal titled **Corrected Endorsement Request** opens, pre-populated with Jazz's drafted correction. **Accepting stages the correction and opens the modal — it does not send anything**. The **Send Request** button inside the modal is the outbound action; Nathan reviews, edits if needed, and sends.

Modal behavior:

- **Recipient** auto-populates from the insurance broker / carrier contact record. If no contact is available, show editable placeholder [Broker / insurance contact].
- **Subject** and **email body** auto-populate (below) and are **editable before send** — Nathan can edit the note/body inline.
- **Buttons: Send Request · Save Draft · Cancel**.

- After **Send Request**: condition state → **Requested · not returned in demo**. Open conditions remain **4. Do not clear the condition and do not decrement the counter**.
- The modal is triggered by the existing decision CTA; **do not add another primary CTA**.

Pre-drafted email body (editable in the modal):

Subject: Corrected Mortgagee / Lender's Loss Payable Endorsement Needed — Solmara Bay Apartments

Hi [Broker Name],

We are completing the insurance review for the Solmara Bay Apartments refinance.

A review identified that the current property insurance evidence still names **Gulfstream Community Bank** as the mortgagee / lender's loss payee. Because this is a refinance, the insurance evidence needs to be updated to name the incoming financing lender:

JPMorgan Chase Bank, N.A., ISAOA/ATIMA

Please provide a corrected mortgagee / lender's loss-payable endorsement, or updated bound policy evidence, reflecting JPMorgan Chase Bank, N.A., ISAOA/ATIMA as the protected lender.

For reference:

- Loan: LN-CRE-2026-0418
- Borrower: Solmara Bay Owner LLC
- Property: Solmara Bay Apartments
- Current evidence reviewed: Mortgagee endorsement and evidence of insurance
- Current named party: Gulfstream Community Bank
- Required named party: JPMorgan Chase Bank, N.A., ISAOA/ATIMA

Please send the corrected endorsement or updated evidence when available.

Thank you, Nathan Brooks

*Build guardrail: the email modal is administrative automation, not underwriting clearance. Sending the request changes the condition to **Requested · not returned in demo**; the condition remains open until corrected evidence is returned, Jazz re-reads it, and Nathan confirms.*

State lifecycle

State	Tag	CTA
Initial	QUALIFYING ISSUE	Accept Drafted Correction → opens request modal; Send Request → Requested
Corrected endorsement returned and read by Jazz	READY FOR CONFIRMATION	Confirm Mortgagee
Nathan confirms	CLEARED BY NATHAN	Cleared

In this demo: requested but **not returned** during the session — only Borrower Coverage Verification (the LOE) completes its round-trip live. On request the tag stays QUALIFYING ISSUE, status **Requested · not returned in demo**.

Guideline Basis (same pill as the category panel): Freddie Mac Multifamily Guide §31.2(e) supports the mortgagee / loss-payable **control type** (representative public benchmark); the **JPMorgan Chase insurance instruction** defines the required party and exact wording (JPMorgan Chase Bank, N.A., ISAOA/ATIMA). ISAOA/ATIMA is lender-required wording, not a Freddie-mandated term. In production, JazzX references the client bank's configured insurance underwriting guidelines.

Presenter note (internal): "Nathan opens the condition: the evidence shows Gulfstream named as protected lender in both the endorsement and the certificate, while the loan file shows JPMorgan Chase as the financing lender. JPMorgan Chase isn't evidenced as protected. Jazz explains the refinance mechanism in two lines and has already drafted the correction — Nathan sends it. In production it comes back, Jazz reads it, Nathan confirms. Requesting it does not clear it — the condition stays open in this demo."

CATEGORY 10 — BORROWER COVERAGE VERIFICATION

Category panel (opens when Nathan clicks the amber row — same workpaper layout as a Part A cleared category)

Borrower Coverage Verification · ⚠ Condition Open · tag: SUPPORT REQUIRED
Property coverage is evidenced under the sponsor's master program, but the borrowing entity is not clearly tied to that coverage; a Letter of Explanation is requested to bridge it.

Evidence

Extracted field	Value	Source
Named insured	Lindover Residential Group LLC (sponsor)	Property policy declarations
Borrowing entity	Solmara Bay Owner LLC	Loan file
Coverage structure	Sponsor master/blanket property program	Property policy declarations
Schedule excerpt	On file; property appears in schedule context, but borrower legal entity not clearly tied to coverage	Master-program schedule excerpt
Required link	Borrowing entity evidenced as covered	Lender requirement

Requirement check

Requirement	Required	Extracted	Result
Named insured / insurable interest	Borrowing entity covered (named or scheduled)	Sponsor named; borrower not clearly matched	X Condition
Borrower-to-coverage link	Solmara Bay Owner LLC tied to the master program	Schedule excerpt does not clearly tie the borrower	X Condition
Master-program evidence	Property program in force	Sponsor master/blanket program in force	Within Requirement

Condition

Condition	Borrowing entity not clearly evidenced as covered under the sponsor's master program
State	SUPPORT REQUIRED
Why open	Named insured is the sponsor; the schedule excerpt does not clearly tie Solmara Bay Owner LLC to coverage
Prepared by Jazz	LOE request with supporting schedule / endorsement reference, drafted and ready to send

Condition	Borrowing entity not clearly evidenced as covered under the sponsor's master program
Post-request state	LOE requested; condition remains open until returned support is reviewed and Nathan confirms
Clears live	Yes — after the LOE is returned, Jazz re-reads it, and Nathan confirms; counter moves 8 cleared / 4 open → 9 cleared / 3 open

[[Review Condition](#)] · [[View Named-Insured Evidence](#)] · [[View Master Program Schedule](#)] · [[View Policy Declarations](#)] · [[Guideline Basis ▼](#)]

Guideline Basis hover:

- **Public reference:** Freddie Mac Multifamily Guide §31.2(d) (named insured) and §31.3 (blanket / master policies) — the control types: who must be insured, and how blanket/master structures are treated
- **Client guideline:** JPMorgan Chase insurance instruction — the borrowing entity (Solmara Bay Owner LLC) must be evidenced as covered, whether named directly or scheduled under the sponsor's master program
- **Source paraphrase:** Coverage must protect the borrowing entity's insurable interest; a master/blanket program is acceptable, but the borrower's coverage under it must be documented.
- **Why Jazz mapped it:** The policy names the sponsor and the schedule excerpt is ambiguous; the public benchmark supports the named-insured / blanket-policy control, and the client instruction requires the borrower to be evidenced as covered.
- **Review result:** Condition Open
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines.*

Presenter note (internal): "Same workpaper as the cleared categories. The nuance: the sponsor's master program exists and is in force — that narrow row passes — but the named insured is the sponsor, Lindover, and the schedule excerpt doesn't clearly tie Solmara Bay Owner LLC, the borrower, to that coverage. So two rows fail on the borrower-to-coverage link. This is the document-chase condition: Jazz drafts the LOE request, and unlike the others, this one completes its round-trip live."

Condition detail

Named Insured Is the Sponsor, Not the Borrowing Entity · SUPPORT REQUIRED LN-CRE-2026-0418 · Solmara Bay Apartments · \$32.0M refinance

⚠ Nathan decision required — insurance clearance cannot issue until the borrowing entity is evidenced as covered under the sponsor's master program.

What Jazz Found

Source	Value	Basis
Property policy declarations	Lindover Residential Group LLC	Named insured on the policy (the sponsor)
Loan file	Solmara Bay Owner LLC	Borrowing entity (the SPE)
Property policy declarations	Sponsor master/blanket property program	Coverage structure
Master-program schedule excerpt	Property appears in schedule context; borrower legal entity not clearly tied	Schedule excerpt on file
Lender requirement	Borrowing entity evidenced as covered (named or scheduled)	JPMorgan Chase insurance instruction

Bank insurance requirement — the borrowing entity's insurable interest must be evidenced as covered; a master/blanket program is acceptable, but the borrower's coverage under it must be documented. Benchmark: Freddie Mac Multifamily Guide §31.2(d) (named insured) and §31.3 (blanket / master policies) support the control types; the JPMorgan Chase insurance instruction requires the borrowing entity to be evidenced. In production, JazzX references the client bank's configured insurance underwriting guidelines.

Nathan Decision

This condition has TWO decision moments across its lifecycle — the request, then (after the LOE returns) the confirmation. Only the confirmation clears it.

Lifecycle moment	Decision	Detail
Initial (SUPPORT REQUIRED)	☒ Request Letter of Explanation (default)	Sends Jazz's drafted request for an LOE + supporting schedule/endorsement reference

Lifecycle moment	Decision	Detail
After LOE returns (READY FOR CONFIRMATION)	☒ Confirm borrower coverage (<i>default</i>)	Confirms the returned LOE provides the documentary bridge tying Solmara Bay Owner LLC to the master program

[View Named-Insured Evidence] · [View Master Program Schedule] — review the evidence before requesting

Initial-state CTA: **[Request Letter of Explanation]** (*primary CTA — opens the request modal*)

Status after request: LOE requested · **condition remains open**. Open conditions remain 4 — requesting does not clear it or move the counter.

Letter of Explanation Request — modal (*opens from the existing [Request Letter of Explanation] CTA — not a second decision CTA*)

When Nathan clicks **[Request Letter of Explanation]**, a modal titled **Letter of Explanation Request** opens. Jazz has pre-drafted the request; Nathan reviews, edits if needed, and sends.

Modal behavior:

- **Recipient** auto-populates from the sponsor / broker contact record. If none, editable placeholder [Sponsor / broker contact].
- **Subject** and **body** auto-populate (below) and are **editable before send**.
- **Buttons:** Send Request · Save Draft · Cancel.
- After **Send Request**: condition state → **LOE requested** (SUPPORT REQUIRED retained). Open conditions remain 4. **Do not clear the condition and do not decrement the counter**.
- The modal is triggered by the existing decision CTA; **do not add another primary CTA**.

Pre-drafted email body (editable in the modal):

Subject: Letter of Explanation Needed — Borrower Coverage Under Master Program — Solmara Bay Apartments

Hi [Sponsor / Broker Name],

We are completing the insurance review for the Solmara Bay Apartments refinance.

The property insurance evidence names **Lindover Residential Group LLC** (sponsor) as the named insured under the master/blanket property program. The borrowing entity for this loan is **Solmara Bay Owner LLC**, and the schedule excerpt on file does not clearly tie the borrowing entity to coverage under the program.

Please provide a Letter of Explanation confirming that **Solmara Bay Owner LLC** and/or the **Solmara Bay Apartments** collateral are covered under the Lindover master/blanket property program, **with a supporting schedule or endorsement reference** evidencing that coverage.

For reference:

- Loan: LN-CRE-2026-0418
- Borrower: Solmara Bay Owner LLC
- Sponsor / named insured: Lindover Residential Group LLC
- Property: Solmara Bay Apartments
- Coverage structure: Sponsor master/blanket property program
- Needed: confirmation + schedule/endorsement reference tying the borrowing entity to coverage

Please send the Letter of Explanation with supporting reference when available.

Thank you, Nathan Brooks

*Build guardrail: the email modal is administrative automation, not underwriting clearance. Sending the request changes the condition to **LOE requested**; the condition remains open until the LOE is returned, Jazz re-reads it and confirms the documentary bridge, and Nathan confirms.*

The live clear (*this is the demo payoff — the one condition that completes its round-trip on screen*)

This is the document-chase moment. Unlike the other three conditions (requested but not returned in the demo), Borrower Coverage Verification completes live:

Step	What happens on screen	State
1	Nathan sends the LOE request from the modal	SUPPORT REQUIRED → LOE requested

2	The LOE returns and is uploaded into the file (Documents tab)	LOE received
3	Jazz re-reads the LOE, confirms it ties Solmara Bay Owner LLC to the Lindover master program with a schedule/endorsement reference	Jazz: bridge confirmed
4	System message: <i>"Letter of Explanation reviewed. Solmara Bay Owner LLC is evidenced as covered under the sponsor's master property program, with supporting schedule/endorsement reference. Nathan confirmation required."</i>	READY FOR CONFIRMATION
5	Nathan reviews the returned LOE + reference and clicks [Confirm Borrower Coverage]	Nathan confirms
6	Condition clears; parent chip flips Condition Open → Cleared ; counter moves 8 cleared / 4 open → 9 cleared / 3 open	CLEARED BY NATHAN

Confirmation-state CTA (appears only at READY FOR CONFIRMATION): **[Confirm Borrower Coverage]** (primary CTA)

State lifecycle

State	Tag	CTA
Initial	SUPPORT REQUIRED	Request Letter of Explanation
LOE returned and read by Jazz	READY FOR CONFIRMATION	Confirm Borrower Coverage
Nathan confirms	CLEARED BY NATHAN	Cleared

Guideline Basis (same pill as the category panel): Freddie Mac Multifamily Guide §31.2(d) (named insured) and §31.3 (blanket / master policies) support the control types (representative public benchmark); the **JPMorgan Chase insurance instruction** requires the borrowing entity to be evidenced as covered. In production, JazzX references the client bank's configured insurance underwriting guidelines.

Build note: the state-aware CTA lives on the **condition**, with a review affordance before each decision. There are two decision moments (Request, then Confirm) but they are **sequential states of the same condition**, never shown at once — the Request CTA is replaced by the Confirm CTA only after the LOE returns. Only the **Confirm** step clears the condition and moves the counter. Cure requires the documentary bridge (LOE +

schedule/endorsement reference); a bare assertion does not clear it. No free-form override — Nathan confirms returned evidence, he does not wave the entity-link through without it.

Presenter note (internal): "This is the payoff. Nathan opens the condition — the policy names Lindover, the sponsor, but the borrower is Solmara Bay Owner LLC, and the schedule doesn't clearly tie them. Jazz drafted the LOE request; Nathan sends it. In the demo, the LOE comes back, gets uploaded, and Jazz re-reads it — confirming Solmara Bay Owner LLC is tied to the master program with a schedule reference. Nathan confirms. The condition clears live, and the counter moves to nine cleared, three open. That's Jazz running the document chase end to end, with Nathan making the call on real returned evidence."

CATEGORY 11 — PROPERTY SCHEDULE AND COVERAGE ADEQUACY

Category panel (opens when Nathan clicks the amber row — same workpaper layout as a Part A cleared category)

Property Schedule and Coverage Adequacy · ⚠ Condition Open · tag: ANALYST JUDGMENT Coverage form, perils, and deductibles are within requirement; the policy schedule (SOV) lists 12 structures while collateral has 13 — Jazz flags the schedule as stale and asks for Nathan's judgment.

Evidence

Extracted field	Value	Source
Coverage form	ISO Special Causes of Loss	Property policy
Deductibles	Reviewed · within range	Deductible schedule
Policy SOV — structures listed	12	Statement of Values (SOV)
Collateral — structures	13 (12 residential + clubhouse)	Building schedule
Schedule gap	Clubhouse (completed ~6 months ago) not on the SOV	SOV vs. collateral

Requirement check

Requirement	Required	Extracted	Result
Coverage form / causes of loss	Special Causes of Loss or equivalent	ISO Special Causes of Loss	Within Requirement

Requirement	Required	Extracted	Result
Deductibles	Within guideline range	Within range	Within Requirement
Schedule completeness (SOV vs. collateral)	All collateral structures scheduled	SOV lists 12; collateral has 13	X Condition

Condition

Condition	Policy schedule (SOV) does not list all collateral structures
State	ANALYST JUDGMENT
Why open	SOV lists 12 structures; collateral has 13 — the recently completed clubhouse is not on the schedule
Jazz assessment	This is a stale-schedule condition, not a coverage shortfall — the schedule should be updated to reflect the 13th structure before closing
Prepared by Jazz	Recommended basis (schedule completeness) + drafted SOV-update request, for Nathan's judgment

[[Review Condition](#)] · [[View Statement of Values](#)] · [[View Building Schedule](#)] · [[Guideline Basis](#) ▼]

Guideline Basis hover:

- **Public reference:** Freddie Mac Multifamily Guide §31.5 (property / hazard insurance) — the control type: collateral must be covered, and the schedule should reflect the insured structures
- **Client guideline:** JPMorgan Chase insurance instruction — the policy schedule must reflect all collateral structures securing the loan
- **Source paraphrase:** Property coverage must extend to the collateral; the Statement of Values should list the structures securing the loan.
- **Why Jazz mapped it:** Form, perils, and deductibles are within requirement; the open item is that the SOV does not yet list the 13th structure (the completed clubhouse).
- **Review result:** Condition Open
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines.*

Presenter note (internal): "Same workpaper as the cleared categories. Two rows pass — the coverage form and the deductibles are fine. One row fails: the SOV lists 12 structures and the collateral has 13. The clubhouse was completed about six months ago and isn't on the schedule yet. Jazz's job here isn't to declare a dollar shortfall — it's to flag the stale schedule and hand Nathan the judgment: is this a schedule-completeness fix, or does he want to read it differently?"

Condition detail

Policy Schedule Does Not List All Collateral Structures · ANALYST JUDGMENT LN-CRE-2026-0418 · Solmara Bay Apartments · \$32.0M refinance

⚠ Nathan judgment required — Jazz has assessed the schedule gap and recommends a basis; Nathan accepts it or sets a different basis.

What Jazz Found

Source	Value	Basis
Statement of Values (SOV)	12 structures listed	Policy schedule of insured structures
Building schedule (collateral)	13 structures (B1–B12 + clubhouse)	Collateral securing the loan
Clubhouse	Completed ~6 months ago	Recent construction; post-dates the SOV
Coverage form / perils / deductibles	Within requirement	Reviewed separately — not the open item
Updated rebuild-cost support	\$38.0M	Context for the schedule (NOT a shortfall figure — see note)

Why this condition exists

The policy's Statement of Values lists 12 structures. The collateral has 13 — the clubhouse, completed about six months ago, post-dates the SOV and isn't on the schedule. The coverage form, perils, and deductibles are all within requirement; the open item is purely that the schedule is stale. This is a schedule-completeness question, not a coverage-amount deficiency.

Why this is NOT a dollar shortfall (the judgment Jazz protects): it would be easy to read this as "\$34.2M in-force vs \$38.0M rebuild = \$3.8M short." Jazz deliberately does not frame it that way: \$34.2M is 90% of \$38.0M, and a multi-building blanket program

can be written to 90% of insurable value — so a "shortfall" reading could be argued compliant and would miss the real issue. The real, defensible condition is that the **schedule doesn't list the 13th structure**. That's what needs Nathan's call.

Nathan Decision *(archetype: Analyst judgment on Jazz assessment)*

Jazz presents its assessment and recommended basis; Nathan exercises judgment across three dimensions:

Decision dimension	Jazz recommendation	Nathan's choice
Assessment basis	Treat as a stale-schedule / schedule-completeness condition	☒ Accept Jazz assessment <i>(default)</i> · or  change basis with rationale
Shortfall framing	Do NOT treat as a naked limit shortfall (\$34.2M vs \$38.0M)	☒ Accept (schedule, not shortfall) · or  override with explanation
Follow-up	Request an updated SOV / endorsement adding the 13th structure	☒ Request updated SOV · or  defer with rationale

[**View Statement of Values**] · [**View Building Schedule**] — review the schedule and Jazz's assessment before deciding

[**Accept Jazz Assessment**] *(primary CTA — records Nathan's judgment on the basis above and stages the follow-up)*

Secondary options *(inline, not separate primary CTAs)*:  *Change basis with rationale* ·  *Defer follow-up with rationale.*

Status after decision: Nathan's judgment is recorded; the follow-up (updated SOV) is **Requested · not returned in demo**. The **condition remains open** until the updated schedule is returned and reviewed. Open conditions remain 4 — recording the judgment does not clear the condition or move the counter. Only Borrower Coverage Verification changes the counter.

Updated SOV returned and read by Jazz	READY FOR CONFIRMATION	Confirm Schedule Completeness
Nathan confirms	CLEARED BY NATHAN	Cleared

In this demo: Nathan records his judgment (accept Jazz's basis), the updated SOV is **requested but not returned** during the session; the condition ends open. Only Borrower Coverage Verification completes live.

Guideline Basis (same pill as the category panel): Freddie Mac Multifamily Guide §31.5 (property / hazard insurance) supports the control type (representative public benchmark); the JPMorgan Chase insurance instruction requires the schedule to reflect all collateral structures. In production, JazzX references the client bank's configured insurance underwriting guidelines.

Build note (archetype: Analyst judgment — decision surface is REAL, not buried): the Nathan Decision is a **visible 3-dimension decision table** with [**Accept Jazz Assessment**] as the primary CTA and two inline secondary options (change basis / defer with rationale). This is what keeps the condition from collapsing into a generic "request updated SOV" — Nathan is exercising judgment on Jazz's *assessment basis*, not just clicking a document request. The \$38.0M rebuild figure appears ONLY in the detail evidence table as schedule context, never as a shortfall headline (90%-trap guard). No "appraised value." One primary CTA; the secondaries are inline alternatives at the same state, not additional primaries.*

Presenter note (internal): "This is the judgment condition. Jazz did the analysis — form and deductibles are fine, but the schedule lists 12 structures against 13 in collateral, because the clubhouse is new. Crucially, Jazz does NOT throw up a '\$3.8M short' headline — it knows that reading is misleading because the limit is 90% of rebuild cost, which a blanket can satisfy. Instead it hands Nathan a real decision: accept that this is a stale-schedule fix, or read it differently. Nathan accepts Jazz's basis, the updated SOV gets requested. That's Jazz supporting human judgment, not just chasing paper."

CATEGORY 12 — FEDERAL FLOOD INSURANCE COMPLIANCE

Category panel (opens when Nathan clicks the amber row — same workpaper layout as a Part A cleared category)

Federal Flood Insurance Compliance · ⚠ Condition Open · tag: *FLOOD EVIDENCE GATE* The flood determination maps five buildings to an SFHA. Flood insurance evidence is on file for three; B4 and B9 have none — clearance is blocked for those buildings until evidence is provided.

Evidence

Extracted field	Value	Source
SFHA buildings (Zone AE)	B3, B4, B7, B9, B11	FZD / SFHDF
Flood evidence on file	B3, B7, B11	Flood policy declarations
Flood evidence missing	B4, B9	(none on file)
Non-SFHA structures	B1, B2, B5, B6, B8, B10, B12, Clubhouse	FZD / SFHDF

Requirement check (*fails only the two buildings without evidence*)

Building SFHA? Flood evidence on file Result

B3	Yes (AE) Yes	Within Requirement
B4	Yes (AE) No	X Condition
B7	Yes (AE) Yes	Within Requirement
B9	Yes (AE) No	X Condition
B11	Yes (AE) Yes	Within Requirement

Condition

Condition	B4 and B9 are SFHA buildings with no flood insurance evidence on file
State	FLOOD EVIDENCE GATE
Why open	Both buildings are in a Special Flood Hazard Area; required flood evidence is not on file
Blocks	Insurance clearance for B4 and B9

Condition **B4 and B9 are SFHA buildings with no flood insurance evidence on file**

Prepared by Targeted flood-evidence request for B4 and B9, drafted and ready to
Jazz send

[[Review Condition](#)] · [[View Flood Determination](#)] · [[View Building-Level Evidence](#)]
· [[Guideline Basis ▾](#)]

Guideline Basis hover:

- **Public reference:** 12 CFR §22.3 — a bank shall not make, increase, extend, or renew a designated loan unless the building securing it is covered by required flood insurance (the control type); 12 CFR §22.9 — borrower notice of special flood hazards before transaction completion
- **Client guideline:** JPMorgan Chase insurance instruction — SFHA buildings securing the loan must carry required flood insurance before closing
- **Source paraphrase:** A designated loan secured by an SFHA building requires flood insurance; the bank gives the borrower notice and does not close without it.
- **Why Jazz mapped it:** B4 and B9 are mapped to an SFHA and have no flood evidence on file; coverage is required before clearance.
- **Review result:** Condition Open
- *Representative public benchmark; production maps to the client's insurance underwriting guidelines. §22.7 force-placement is a post-closing servicing backstop and is not part of this clearance step.*

Presenter note (internal): "The simplest of the four conditions, and that's the point. Five buildings are in a flood zone. Three have flood evidence; B4 and B9 don't. The requirement check fails only those two. Jazz makes the gap precise — not 'flood docs missing' but 'B4 and B9 need flood evidence and none is on file' — and clearance is blocked for them until it's provided. The regulation sits in the Guideline Basis hover; the panel just shows the gap."

Condition detail

B4 and B9 Require Flood Evidence · FLOOD EVIDENCE GATE LN-CRE-2026-0418 ·
Solmara Bay Apartments · \$32.0M refinance

 **Insurance clearance is blocked for B4 and B9 until flood evidence is provided. This is a regulatory gate, not a judgment call — it cannot be waived.**

What Jazz Found

Building	Flood zone	Flood evidence	Status
B4	SFHA (Zone AE)	None on file	Clearance blocked
B9	SFHA (Zone AE)	None on file	Clearance blocked
B3, B7, B11	SFHA (Zone AE)	On file	Within requirement

Why this condition exists

The flood determination maps B4 and B9 to a Special Flood Hazard Area. Required flood insurance evidence is on file for the other three SFHA buildings but not for B4 and B9. Because these are SFHA buildings securing the loan, flood coverage is required and insurance clearance for them is blocked until evidence is provided.

What clears it: flood insurance evidence (declarations / policy) for B4 and B9 meeting the required coverage. Jazz re-reads the returned evidence, confirms it covers both buildings, and presents it for Nathan's confirmation. This is a hard gate — there is no discretionary basis to accept the buildings without it.

Nathan Decision (*archetype: Flood Evidence Gate*)

This is not a judgment call. Nathan cannot accept or waive past a missing flood requirement on an SFHA building. The action is to initiate the targeted evidence request:

Decision	Detail
☒ Request flood evidence for B4 and B9 (<i>default</i>)	Sends Jazz's drafted targeted request for flood declarations covering B4 and B9
 Add a note to the request (<i>optional</i>)	Nathan can add context before sending

[**View Building-Level Evidence**] — review the building-level flood status before requesting

[**Request Flood Evidence (B4, B9)**] (*primary CTA — opens the targeted request modal*)

*Status after request: flood evidence **Requested** · not returned in demo. Clearance for B4 and B9 **remains blocked** — requesting does not clear it or move the counter. Open conditions remain 4. Only Borrower Coverage Verification changes the counter.*

State lifecycle

State	Tag	CTA
Initial	FLOOD EVIDENCE GATE	Request Flood Evidence (B4, B9)
Flood evidence returned and read by Jazz	READY FOR CONFIRMATION	Confirm Flood Coverage
Nathan confirms	CLEARED BY NATHAN	Cleared

In this demo: flood evidence is **requested but not returned** during the session; clearance for B4/B9 stays blocked. Only Borrower Coverage Verification completes live.

Guideline Basis (same pill as the category panel): 12 CFR §22.3 (a bank shall not make/increase/extend/renew a designated loan unless the secured building carries required flood insurance) and §22.9 (borrower notice before transaction completion); the JPMorgan Chase insurance instruction requires SFHA buildings to carry flood insurance before closing. §22.7 force-placement is a post-closing servicing backstop, not part of this clearance step. In production, JazzX references the client bank's configured insurance underwriting guidelines.

Presenter note (internal): "Nathan opens it: B4 and B9, both in the flood zone, both with no flood evidence. The other three SFHA buildings are fine. This isn't a judgment — federal rules don't bend, and Nathan can't wave it through. He sends the targeted request for flood evidence on exactly those two buildings. Clearance stays blocked until it comes back. Precise, simple, and clearly a different motion from the other three conditions."
